Life Sciences Parks

Wissenschafts- und Technologiepark Adlershof

Adlershof is a leading site for Biotechnology and Life Sciences in Berlin-Brandenburg. The Centre of Biotechnology and the Environment (Zentrum für Biotechnologie und Umwelt, ZBU I) extends over 200m with 13,000 square metres of rentable space, while 7,200 square metres are available in the ZBU II. Offering premium technological facilities, with extensive equipped lab areas, the spaces are tailored to young biotech businesses.

www.wista.de

berlinbiotechpark

berlinbiotechpark offers successfully growing companies the ideal location and the infrastructure to develop advanced technologies. berlinbiotechpark is located in the very heart of Berlin – one of the most important biotechnology regions in Germany. The integrated concept – office, laboratory and production space with technical infrastructure and services – is unique in Germany

berlinbiotechpark.de

Biotech Campus Potsdam

Just a few minutes away from Potsdam's central railway station in the direction of Caputh, BIOTECH CAMPUS POTSDAM is located on the Hermannswerder peninsula in the river Havel. It is owned and operated by BIOTECH CAMPUS POTSDAM GmbH, a fully owned subsidiary of the Investment Bank of the State of Brandenburg.

www.potsdam.de/content/biotech-campus-potsdam

Biotechnologiepark Luckenwalde

Located just 30 miles south of Berlin and 25 miles from Berlin-Brandenburg International Airport in the rural district of Teltow-Flaeming, the Biotechnology Park Luckenwalde is one of the most modern facilities of its kind in Germany. It is home to 35 companies with 500 employees from Germany, USA, UK, Korea, India, Italy and Russia.

swfg.de

Campus Berlin-Buch

Campus Berlin-Buch in the northern part of Berlin is an innovative science, health and biotechnology park where companies and institutions conduct basic and clinical research. Among the features unique to the campus are the clear focus on biomedicine and the closeness of the institutions to each other both spatially and with regard to scientific interaction and collaboration.

campusberlinbuch.de

Innovationsforum Hennigsdorf

The "Innovationsforum Hennigsdorf" offers affordable rental opportunities and a selected portfolio of services and advice to young start-ups as well as medium-sized companies. Therefore Hennigsdorf is a center of excellence for life sciences, especially in the field of red biotechnology and medical technology.

innovationsforum-hennigsdorf.de

Potsdam Science Park

The Potsdam Science Park in Golm is the largest and fastest growing location for innovative solutions in Brandenburg. It is part of Potsdam's scientific landscape, with more than 40 internationally renowned research institutes forming a unique research cluster and campus in the countryside – easily accessible from Berlin and Schönefeld Airport.

potsdam-sciencepark.de

Innovationspark Wuhlheide

So far 200 companies have decided to locate at the Wuhlheide Innovation Park, where the creative environment and service-oriented management provide important stimuli with respect to product development and innovation. Our companies have attractive office accommodation, workshops, laboratories and service areas at their disposal. Furthermore, they also have the opportunity to acquire fully developed investment sites for the evolution of their company! The location stands for successful new businesses, growth and long-term perspectives.

Alacris Theranostics is developing personalized approaches in oncology with innovative molecular diagnostics based on next generation sequencing (NGS), bioinformatic and systems biology approaches. Alacris supports individualized therapy selection through its Comprehensive Molecular Tumor Analysis (CMTA) and through its proprietary computer software ModCell™ for the prediction of drug response.

alacris.de

Alimera Sciences Ophthalmologie GmbH

Alimera Sciences is specialized in the development of innovative therapies in the field of chronic retinal diseases. The focus is on the treatment of chronic diabetic macular edema with Iluvien®.

alimerasciences.eu

AmpliVak	
AmpliVak develops a proprietary immunization technology based on in vivo loading of dendritic cells with tumor antigens. The induced cytotoxic T cells are then amplified in the body of the patients up to 500-fold ("amplification"), which leads to a highly efficient elimination of tumor tissue. This therapeutic vaccination, which will be clinically tested together with the oncology department of the Charité, is of universal nature and can thus be applied in a variety of tumors.	
AnaKat Institut für Biotechnologie GmbH	
AnaKat Institut für Biotechnologie GmbH has specialized on analytical determination of pharmaceutical ingredients.	anakat.de
Analytica Alimentaria GmbH	
Analytica Alimentaria GmbH is an international food safety company. Our expertise includes the analysis of pesticides, contaminants, heavy metals and disinfectants in food, using e.g. multi GC/LC MS/MS. Our highly qualified team of more than 150 scientists, agronomists and technicians develops proactive solutions, like new analytical methods e.g. for toxins or other critical residues. Smart food safety goes beyond lab work: we identify potential crises at an early stage.	analyticaalimentaria.de
AnalytiCon Discovery GmbH	
AnalytiCon Discovery has a strong focus on natural product based drug discovery services. AnalytiCon's libraries: Isolated natural products from plants and microbes, synthetic libraries based on natural product motifs, macrocyclic and virtual libraries are building up a complete chemical ecosystem. AnalytiCon's services: Our libraries are well suited for biological and bio-structural profiling addressing challenging problems with a high need of new chemical space. In-vitro, fragment based, in-silico and fully integrated drug discovery services are available. AnalytiCon's team: Highly motivated and talented team of natural product, separation, analytical, computational, synthetic and medicinal chemists and biologists.	ac-discovery.com
AnaTox GmbH & Co. KG	
AnaTox is a software and service company for maintenance and qualification of LC/GC/MS instruments in the so-called regulated environment. The main topic is the development and support of automated qualification tools and software for chromatographic equipment. The main product is the AIQ-Tool® software that automates and makes qualification independent from the instrument manufacturer and the customer CDS (chromatographic data system). AnaTox provide software solutions for manufacturer, service provider and customers.	anatox.de
Angiobiomed GmbH	
Founded in 2015, AngioBiomed has developed several proprietary mouse monoclonal antibodies that block the interaction between the vasoactive peptide hormone adrenomedullin (ADM) and its receptor.	dbi-ag.de/beteiligungen/angiobiomed
ANiMOX GmbH	
Development of applications for the use of natural peptide / amino acid mixtures in chemistry and biotechnology, f.i. as a scavenger material in formaldehyde bounded formulations, foaming or hydrophobic Tensid compounds or as a N-source in biotechnological fermentation processes, distribution of a technology for the production of such basic materials from raw and residual materials.	animox.de
aokin AG	
Aokin AG is a Berlin biotechnology company that is specialized in the development and commercialization of innovative analytical systems on the base of the rapid kinetic assay technology. The aokin systems are unique in their precision and operating speed. Areas of application are food and antibody analytics as well as clinical diagnostics. We also offer laboratory services in the area of food analytics, Pharmacodynamics and chemical synthesis.	aokin.com
Applichrom GmbH	
AppliChrom produces chromatography media, columns and applications for HPLC, GPC, SEC, HILIC, Ion Exchange Chromatography, Ligand Exchange Chromatography, Ion Exclusion Chromatography. AppliChrom serves customers analysing biomolecules including biopolymers, technical polymers - from 100Da up to 40Mio Dalton. Short delivery times, high quality of chromatography columns (suitability/resolution/application, long-time-reproducibility, durability), pre- and after-sales service, liquid-chromatography seminars are available.	applichrom.de
Aptarion biotech AG	
Aptarion Biotech develops biostable L-aptamers for the treatment of life-threatening diseases. Spearhead of our therapeutic strategy is AON-D21 that binds and inhibits complement factor C5a with a unique mechanism of action. Encouraging preclinical data in several disease models support the development of AON-D21 in acute inflammatory indications as well as in lung cancer. In a single-ascending dose study in healthy volunteers, AON-D21 was shown to be safe and well tolerated.	aptarion.com

ARGUS Umweltbiotechnologie GmbH	
ARGUS is a medium-sized company. Since 1987 ARGUS works on the field of remediation of contaminated groundwater, soil, waste water and waste air. ARGUS is able to elaborate a specific remediation program in each different pollution case considering economic aspects beside ecological aspects. All necessary treatment steps can be planned and carried out. The combination of microbiological steps with classic processes leads to a successful remediation of complex contamination.	argus-umwelt.de
Arkcell GmbH	
As a start-up, we are establishing and operating a Biobank for autologous cells and tissues. Our service includes collecting, processing, and storing cells and tissues required for clinical studies or cell therapy treatment as well as the cold chain logistics. The assessment of individual requirements in biological products for feasible applications is based on AI-based integrated IT solutions. We offer Patients advocacy and referral service for advanced medical treatment centers and the supply of biological samples and associated data for research and treatment.	
Artemiflow GmbH	
Artemiflow is a spin-off from the Max Planck Institute of Colloids and Interfaces (MPIKG). By the industrial use of an international patent held by MPIKG, Artemiflow uses a new process to produce Artemisinin from dihydroartemisinic acid (DHAA). DHAA is available in abundance in the waste of the current production process for Artemisinin.	artemiflow.com
ASC Oncology GmbH	
ASC Oncology developed the Reverse Clinical Engineering®, a test procedure to determine for individual patients with malignant solid tumors which anticancer treatments are most likely to be effective. The in vitro diagnostic test is based on patient-derived 3D cell cultures (PD3D®), so-called tumor organoids, obtained from a patient's vital tumor sample. This enables a personalized therapy with presumably higher likelihood of survival and a better quality of life to be selected as early as possible.	asc-oncology.com
ASCA GmbH Angewandte Synthesechemie Adlershof	
ASCA is a partner for contract research in chemical synthesis. The development of new active structures on a laboratory scale is offered. In-house analytical facilities are available. ASCA also offers reference materials for analytical purposes. Our catalogue comprises more than 400 compounds and metabolites such as pesticides, API's, mycotoxines and plastic additives (native and labelled).	asca-berlin.de
Aska Biotech GmbH	
ASKA Biotech is your independent and reliable contract manufacturer for the development and production of recombinant proteins and monoclonal antibodies in mammalian cells and immunoassay kits. As an ISO 13485:2016 and ISO 9001:2015 certified company, ASKA provides constant high-quality services for research, in-vitro diagnostic (IVD) companies and preclinical trials. With over 30 years of experience in protein production, ASKA provides customized and flexible solutions for each requirement.	aska-biotech.de
Astra Biotech GmbH	
Astra Biotech GmbH offers high quality reagents, allergens, antibodies, recombinant proteins, and assays for the determination of hormones, allergies, tumour markers and infectious diseases. Quality is one of the key cornerstones on which Astra Biotech maintains its reputation and with which we strive to increase customer satisfaction and gain growing customer loyalty. We take great pride in our highest quality assays, which are all IVD compliant and therefore suitable for direct, accurate and reproducible diagnostic purposes, as well as for research.	astrabiotech.de
Athenion GmbH	
Athenion AG focuses on the development and distribution of high-quality products for the pharmaceutical and healthcare markets. We seek and identify promising developments of active pharmaceutical ingredients, new care and health products as well as exciting technologies.	athenion.com
ATLAS Biolabs GmbH	
ATLAS Biolabs is a leading European service provider of complex analyses in molecular genetics including next-generation sequencing and microarray services complemented by high-level data analyses. We build close relationships with our clients to achieve the highest level of client satisfaction. Our quality management is certified according to DIN EN ISO 9001:2015. The laboratory is accredited by DAkkS according to DIN EN ISO/IEC 17025:2018, as listed in the annex of D-PL-21662-01-00.	atlas-biolabs.com
Atlas Medical GmbH	
Development, supplier, manufacturing and international distribution of quality diagnostic and medical equipment like Diagnostic reagents and Kits for use in labs, clinics and hospitals. Specialised on Latex related kits, carbon-antigens, blood culture bottles, rapid tests and urine reagent strips, stains for microbiology and histopathology, ELISA kits, Drug-of-Abuse and Hometests (OTC) like Fertility Home Tests & General Health Screening Tests.	atlas-medical.com

Attomol GmbH Molekulare Diagnostika	
The company's aim is to develop, produce and distribute medical diagnostics for human medicine in the field of molecular genetics, infectious and autoimmune diseases.	attomol.de
AudioCure Pharma GmbH	
AudioCure is dedicated to the development of drug treatments for hearing disorders with a high unmet medical need. By protecting and restoring the cellular key players that are critical to the hearing process, our therapeutic approach goes beyond treating symptoms to tackle the root cause of the disorders.	audiocure.com
Aurora Europe GmbH	
Aurora Deutschland is a licensed pharmaceutical manufacturer, importer and wholesaler in the meaning the German Medicines Act and a licensed narcotics dealer in the meaning of the German Narcotics Act.	auroramedicine.com/de
Auto Tissue Berlin GmbH	
The company is engaged in the development, production and marketing of medical devices for cardiovascular surgeons. The products are specially made for the patients and have less side effects. The first certified product was a pulmonary heart valve (Matrix P) for the right ventricular outflow tract reconstruction (RVOT). The second product is also a heart valve which considerably shortens the operation time (Matrix P plus). Meanwhile a complete glutaraldehyde free valve is available called Matrix P plus N.	autotissue.de
AZ Biopharm GmbH	
Analytisches Zentrum (AZ)-Biopharm Berlin GmbH is an independent GLP and GMP certified contract research organization with a profound experience in the field of bioanalytics, pharmaceutical quality control for human and veterinary medications and the determination of physicochemical parameters of chemicals according to OECD guidelines. Providing customized analytical solutions from research & development to routine analytics, AZ Biopharm uses well established (USP, PhEur, JP,etc) to in house developed sophisticated analytical techniques. AZ Biopharm's bioanalytics offers for more than 20 years method development and validation according to FDA and EMA guidelines for tox, PK and BE studies with quick turnaround and unbiased quality.	az-biopharm.de
BASF Metabolome Solutions GmbH	
BASF Metabolome Solutions GmbH is a 100% affiliate of BASF SE. Formerly known as metanomics GmbH, a team of 50 scientists and technicians provides Metabolite Profiling, mass spectrometry-based compound analytics, and plant testing services to internal and external clients. Work is performed under ISO 17025-like and Good Laboratory Practice (GLP) quality standards.	basf.com
bbCell GmbH	
bbCell GmbH focuses on research and development in the field of cell therapies/advanced therapy medicinal products/ATMPs and biological products, especially tissue engineered products, medical devices, in vitro diagnostics and related technologies.	
bbi-biotech GmbH	
In the focus of the activities of bbi-biotech lie systems for the sterile sampling from bioreactors for all applications in the biotechnology, pharmaceutical, food, cosmetics and chemical industry. In addition, bbi-biotech develops components - in especially disposable ones - for the preparation of a new generation of fermentors and bioreactors and offers consulting and planning services for biotech projects, its implementation and services.	bbi-biotech.com
Beacon Medical Germany GmbH	
ABCann Germany GmbH is the German affiliate of Canadian VIVO Cannabis Inc, an integrated supplier of cannabis. ABCann Germany GmbH has a pharmaceutical wholesale licence and has pending applications for GMP-import licences and narcotics licence. ABCann Germany plans to commercialize medicinal cannabis products in Germany and the EU.	beaconmedical.de
BEB BioEnergy Berlin GmbH	
Planning, Design, Construction, Supervision and Implementation of Biogas/Hydropower plants, Preplanning, Feasibility Studies and Research activities in the field of renewable energies, Optimization of the process in existing biogas plants.	bebgmbh.de
Becanex GmbH	
Becanex GmbH (Berlin Cannabis Extraction) was founded in January 2019 with headquarters in Berlin-Adlershof and has been an independent manufacturer of PIEX cannabis products (plant-identical extracts) since 2023. By means of their self-developed technology, Becanex succeeds in mirroring the ratio of THC to terpenes in the extract in the ratio of the substances in the original flower. This makes PIEX products an alternative to flowers in cannabis therapy. The product portfolio includes THC- and CBD-rich adjusted cannabis extracts according to DAB, raw extracts as active pharmaceutical ingredients and dronabinol.	becanex.com

Belano Medical AG	
BELANO medical AG researches and markets novel therapeutic approaches based on positively acting microorganisms, so-called specific microbial cultures. Patent-protected active ingredients are developed for applications in the fields of cosmetics, nutrition and health.	belanomedical.com
Belyntic GmbH	
Belyntic GmbH is a chemistry-for-healthcare enterprise focusing on the purification of peptides. Based on its proprietary "Peptide Easy Clean" (PEC) technology, Belyntic offers the world's first broadly applicable peptide purification kits. PEC enables first-in-class parallel purification and modification of difficult peptides with low ecological impact using catch-and-release methodologies.	belyntic.com
Berlin Cures GmbH	
The company's goal is to bring aptamers as new drug candidates against autoantibody-induced dilated cardiomyopathy and other autoantibody-associated diseases into the clinical application.	berlincures.de
BerlinAnalytix GmbH	
BerlinAnalytix is specialized in the in vitro and in vivo testing of various biomaterials. The in vitro testings are focused on the analysis of the cytocompatibility of biomaterials in accordance to the EN ISO 10993-5 using XTT-, BrdU- and LDH-assays and LIVE/DEAD-stainings. Moreover, the in vivo and clinical analyses include the histological assessment of soft and hard tissue samples and the application of specialized histochemical and immunohistochemical stainings, qualitative and quantitative data analysis, and scientific documentation.	berlinanalytix.com
BioAnalyt GmbH	
Bioanalyt develops and distributes the worldwide first easy-to-use and portable test kits for the analysis of vitamins and micro nutrients. The iCheck-iEx test kits enable food producers, food authorities and NGOs to monitor their ongoing food programs more efficiently and at low-cost. The company was founded in 2006 by Prof. Dr. F. J. Schweigert as a spin-off of the University of Potsdam. Read more on our website www.bioanalyt.com .	bioanalyt.com
BIOCYC Gesellschaft für Biotechnologie und Recyclingverfahren mbH & Co. Entwicklungs KG	
Production of bio-chemicals, peptides, in vitro-diagnostics, test-kits. Development of consumer service for peptides and biochemicals.	biocyc.de
BioGenes GmbH	
BioGenes GmbH, founded in 1992, is a worldwide acting full-service provider of customized antibody and immunoassay development with a strong commitment to quality and service. The company provides highly customized solutions for quality control of biological products (HCP), drug discovery, drug development, manufacturing of biologics as well as for diagnostic purposes. BioGenes is a recognized partner of biotech and pharmaceutical companies all over the world.	biogenes.de
Bioline GmbH	
Our mission is to provide customers with a range of products which are fast and easy to use, guaranteed to work and developed by scientists who understand what our customers are trying to achieve so they can focus on their scientific goals. Bioline reagents are used by molecular biologists and other research scientists to perform test-assays and research in many fields from medical, biotechnology and marine biology.	bioline.com
BioMedion GmbH	
IT-Service for all GxP-Regulatory Tasks Data- and Document Management, Long-Term-Archiving and Digital Signature, SOP-Management, CAPA, Raw Data Management, Consulting for Validation of Computerized Systems according to GAMP4/5.	biomedion.com
Biomes NGS GmbH	
Biomes NGS GmbH is a biotechnology startup that analyzes the DNA of microbes living in and on the human body with the Next Generation Sequencing Method. The results are personal microbiota profiles, based on which customers receive individual recommendations for improving their quality of life. The first product INTES.T.pro is an intestinal flora self-test to combat gut flora complaints.	biomes.world
BIOPRACT GmbH	
Service and Additives (enzymes, trace elements, microbes) for biogas and waste water sludge treatment Enzyme analysis in agriculture industry Contract research feed additives.	dsmbiogas.com
BioRefinery.de GmbH	
Based on main precursors of plants, carbohydrates in kind of sugar, starch and cellulose, and proteins, the biorefinery.de company has developed four complex product lines (Biorefinery systems) which leads to a great number of valuable products with the help of chemistry and biotechnology.	biorefinery.de

BioRepro GmbH	
BioRepro is the first pharmac. company, whose core competency is the breeding of leeches under controlled laboratory conditions for medical therapies. We concentrate on the establishment of GMP breeding procedures and will be able to provide leeches with standardized quality while equally allowing scalability to supply medical demand. Additionally, through the re-initiation of fundamental research, we will gain deeper understanding of further potential in medical and cosmetic treatment areas.	biorepro.de
BIOSYNTAN Gesellschaft für bioorganische Synthese mbH	
BIOSYNTAN is focused on custom synthesis of peptides. As one of the leading specialists in the synthesis of linear and cyclic peptides with unusual residues and a multitude of modifications we can offer you an extensive range of services today. Our core area is the manufacturing of fluorescently labeled peptides for assay development and the synthesis of post-translationally modified peptides.	biosyntan.de
Biosynth GmbH	
Specialist for drug delivery of peptides, proteins, nucleotides using various DD systems: PEGylation, PEG-b-copolymers, HPGs, and others. Covalent modification of biopharmaceuticals with PEGs or non-covalent drug delivery to improve pharmacological properties. Offers PaSmax® technology for synthesis of highly drug-loaded ADCs, and celaSTAR for multiplexing of biologics to increase affinity. Celares offers customized PEGylation solutions and synthesis of special polymers.	celares.com
Biotechnologie Kempe GmbH	
We focus on development and construction of measuring and control equipment for applications in food and fermentation industries. In our separate programming department, highly specialized computer engineers develop systems for process computer aided automation in the field of fermentation industries.	biotechnologie-kempe.de
biotechrabbit GmbH	
biotechrabbit GmbH is determined to offer the newest and best life science products and innovative solutions to scientists leading the fight against disease and fueling our lives with innovations. We supply ultra pure enzymes and high-quality antibody services for diagnostics and a life science product portfolio (including reagents for PCR and nucleic acid purification) for molecular biology and proteomics. The biotechrabbit advantage is our combination of passion for excellent research with the agility of true entrepreneurship.	biotechrabbit.com
BioTeZ Berlin-Buch GmbH	
BioTeZ is part of the BBI Solutions group. We have served the global diagnostics industry for over 50 years. Our range of immuno-diagnostics reagents includes human antigens, antibodies, gold nanoparticles and conjugates, enzymes, human proteases, serum and plasma products, systems for detection and immobilization. A unique combination of custom antibody, assay development, DNA primer synthesis, immune affinity chromatography and manufacturing services.	biotez.de
biotx.ai GmbH	
biotx.ai is the first company to go from biobank data all the way to a clinical trial phase 2b. We did so purely computationally to find a treatment for severe COVID-19 via what they call synthetic clinical trials, without a single wet lab experiment, for a fraction of the cost and time faster needed. In addition to the drug in phase 2b, their talented team also has molecules in several disease areas in pre-clinical and phase 1. Please do not hesitate to contact us when you want to learn more.	biotx.ai
BLOWORX	
BLOWORX offers services in the fields of contract research for customer-specific Biotransformations, the screening, isolation and production of Biocatalysts from microorganisms and plants and the bioanalytic syntheses. Further organic compounds and metabolites will be synthesized with enzymes for customer in kg scale.	bioworx.de
Birdotech Berlin GmbH	
Birdotech specializes in providing chemical building blocks, reference compounds, and custom synthesis for the purpose of pharmaceutical research and innovation. With a strong team of chemical development experts, our worldwide CRO & CDMO services of small molecules are reliable, cost-effective and on time.	birdotech.com
Blue Biolabs GmbH	
Blue Biolabs is a spin-off company from the TU-Berlin, which specialises in the development of products and services in the field of environmental analysis using methods of microbiology and molecular biology.	bluebiolabs.de
Bluu GmbH	
Foodtech company Bluu Seafood is the leading company in Europe to specialize in the development and commercial production of tasty seafood products directly grown from cells. A pioneer at the interface of biotechnology and food technology, Bluu Seafood is stepping up to produce high-quality, healthy, and sustainable products.	bluu.bio

Bruker Nano GmbH – JPK BioAFM Center	
JPK Instruments AG is a world-leading manufacturer of nanoanalytic instruments - particularly atomic force microscope (AFM) systems and optical tweezers - for a broad range of applications reaching from soft matter physics to nano-optics, from surface chemistry to cell and molecular biology. From its earliest days applying atomic force microscope (AFM) technology, JPK has recognized the opportunities provided by nanotechnology for transforming life sciences and soft matter research.	jpk.com
BST Bio Sensor Technology GmbH	
BST develops and produces biosensors to provide high quality analysis at moderate prices. In 1982 BST brought on the market the first multi-way biosensor based blood glucose analyzer in Europe and is since then market leader in Europe. Today BST sells more than 60.000 sensors a year. Since 2008 BST is besides biosensors also manufacturer of POCT and laboratory instruments.	bst-biosensor.de
Cambrium GmbH	
Cambrium is a next-generation materials company. Using our AI enabled, highly-automated platform, we program proteins to create materials with unseen properties. From cosmetics, to fashion, to plastics; virtually everywhere where animal-, mineral-, and petroleum-derived materials are being used today, programmable proteins can do it better.	cambrium.bio
CannaPhytica BioMed GmbH	
There are more than 40 diseases that can be treated with cannabis. Still not all cannabis plants apply to all patients. The effect of a certain cannabis strain is dependent on both the patient and the concentrations of cannabinoids and other substances of the plant (entourage effect). We do research to find the right cannabis plant for the right patient and disease.	cannaphytica.com
Cannovum Health AG	
Cannovum AG is the first German listed fully-licensed cannabis company. We are a Berlin based wholesaler, importer and manufacturer of cannabis-based medicinal products and provide patients with medical cannabis. The company focuses on the import of high-quality cannabinoid products, medical scientific education and all-encompassing distribution for simplified and facilitated access to cannabis-based therapies.	cannovum.com
Cantourage GmbH	
Cantourage, founded in 2019, is a leading European company for the production and distribution of cannabis-based medicinal preparations and drugs. The company enables producers from around the world to become part of the growing European medical cannabis market and offers pharmaceutical-grade products in all relevant market segments: dried flower, extracts, dronabinol and cannabidiol. Cantourage is listed on the Frankfurt Stock Exchange (FRA: HIGH). In 2023 Cantourage launched Telecan, its own telemedicine platform for medical cannabis.	cantourage.com
Cell Science Systems GmbH (Alcat Europe)	
Cell Science Systems (CSS) offers the Alcat Test, an immune cell activation test to identify inflammation causing foods and diet related items by detecting cell changes. The diet modification has shown benefits with gastrointestinal disorders, metabolic syndrome, skin diseases, arthritis, migraine headaches, etc. It has been independently validated by Yale University and other institutions to discover links between immune induced injuries related to diet.	cellsciencesystems.com
Cellbricks GmbH	
Cellbricks developed a new Bioprinting technology which allows creating complex three-dimensional structures made of biological material. The company is specialized in Bioprinting services, creating tailor-made products to individual customer specifications - for example mini-organs for drug testing or tissues for regenerative medicine cultures as well as off the shelf products. With its profound experience Cellbricks empowers researchers to investigate functional human tissues for fundamental biological research or advanced regenerative therapies.	cellbricks.com
CellDEG GmbH	
CellDEG applies its unique membrane aeration technology to highly efficient cultivation systems for microalgae. Optimal CO2 mass transfer rates into photosynthetic cultures result in highest growth rates, cell densities and natural product concentrations. CellDEG provides modular cultivation solutions that allow for fast and reliable production of biomass and is aiming to establish a new standard in lab scale and pilot scale cultivation to exploit the full potential of these organisms.	celldeg.com
CellDot GmbH	
The company deals with the research and use of human-induced pluripotent stem cells (iPSCs) for research purposes, clinical studies, and stem cell therapy. Our services include the production and preservation of fully characterized autologous iPSC cell lines. As the parent company of the Arkcell GmbH, we are managing the operational business of the biobank for autologous human cells and tissues. The product list range from clinical-grade mesenchymal stromal cells for therapeutic purposes and autologous iPS cell lines to T cells as the starting material for CAR T cells.	celldot.tech

CELLphenomics GmbH	
Cellphenomics' core competence is the establishment and cultivation of complex patient-derived 3D cell culture models (PD3D®) from various solid tumor tissues, and their application for research, and high-throughput as well as personalized toxicity testing. Their continuously growing biobank comprises more than 450 complex in vitro models from more than 20 tumor entities and is complemented by clinical and molecular data to support different research interests.	cellphenomics.com
CellServe GmbH	
CellServe is a service provider for research groups in regenerative medicine and fills an important gap in the conversion of applied treatment concepts from research into marketable products. Furthermore CellServe develops own innovative cell-based products for cardiology and uses novel cardiac derived cells ("From the Heart to the Heart") for the treatment of chronic heart failure.	cellserve.de
Celltainer Biosolutions GmbH	
Celltainer Biotech developed a multi-purpose single-use bioreactor, suitable for microbial fermentation as for fragile cells. This technology, combined with a unique bag design results in high-performance bioprocesses providing a high productivity at low costs for a wide variety of applications.	celltainer.com
CellTrend GmbH	
CellTrend is certified according to ISO 9001, ISO 13485 and GMP; CE labeled ELISAs for the determination of Antibodies against G-Protein-Coupled-Receptors (GPCR), Tyrosine Kinase Receptor (TKR) and Growth Factors (X-GF); Cell culture systems (CRO); Development and production of antibody-based detection systems (ELISA) Consulting (Qualified person).	celltrend.de
Centogene AG	
Centogene is a worldwide leader in the field of genetic diagnostic testing for rare hereditary diseases, with a broad test portfolio covering over 2800 genes, biochemical tests, biomarker and clinical whole exome sequencing and whole genome sequencing.	centogene.com
Central BioHub GmbH	
Central BioHub is the online marketplace for human biospecimens. We connect life science researchers and biospecimen suppliers worldwide on one platform. Intelligent filter options (parameter, disease, donor information etc.) make biological sample sourcing efficient and accelerate medical research. Our easy, transparent and compliant processes cut down your procurement efforts from months to minutes.	centralbiohub.com
CheckImmune GmbH	
CheckImmune is an innovative service company offering the full biomarker package, from consulting and laboratory services to scientific and medical data interpretation, with a focus on immunology. Our services include: Selection, development, validation, application and evaluation of immunological biomarkers using cutting-edge technologies for lead candidate selection. Proof-of-concept studies on target patient populations (phase 0) and stratification of patient groups. Therapy monitoring in clinical trials with a wide range of already validated assays as much as newly developed customized methods. Available technology platforms are Flow Cytometry, Multiplex Ligand Assays, Anti-Drug Antibody Assays, Functional Assays and Single Cell Analysis.	checkimmune.com
ChemBio Diagnostics GmbH	
Chembiodevelops and produces mobile readers for quantitative analyzes of Immunoassays for Point-of-Care-diagnostics, especially Lateral Flow Assays (LFA). Additional business segments are components and Systems for signal transmission and sensors for Ibioanalytics. opTricon develops the devices in partnership with the customers and works as OEM-suppliers and is certified by TÜV Rheinland according EN ISO 13485:2003+AC: 2007 and EN ISO 9001:2008	chembiogermany.de
chemicell GmbH	
Chemicell develops and produces magnetic, fluorescent and coloured nano- and microparticles, reactive fluorescent dyes and special chromatography-materials for the separation or detection of cells, bacteria, viruses, proteins or DNA/RNA and new gene transfer systems.	chemicell.com
Chiracon GmbH	
chiracon is a qualified partner to develop chiral intermediates at a constant high quality for innovative drugs regarding economic, environmentally acceptable and scaleable aspects. We offer support through expert knowledge and key technology to meet your increasing needs. Our core competence is chirality. In addition we have a broad variety of chiral building blocks as an inhouse raw material source for high-level API production and development.	chiracon.de
CMZ-Assay GmbH	
Marketing of diagnostic reagents for measuring concentrations of proteins, hormones and their isoforms, exclusively for research purposes.	cmz-assay.com

co.don AG	
CO.DON AG develops, produces and distributes autologous cell therapies for the minimally invasive repair of cartilage defects. The product being marketed is a cell therapy product for the minimally invasive treatment of cartilage damage in the knee joint that uses only the patient's own cartilage cells ("autologous chondrocytes"). CO.DON's method is currently used in over 200 clinics in Germany and more than 17,000 patients have already been treated. In July 2017 CO.DON AG received central EU marketing authorisation for this product, followed by the marketing authorization for Switzerland in March 2019. At the Leipzig site, CO.DON has built one of the largest facilities for the production of human cells on an industrial scale for in-house and contract manufacturing. The shares in CO.DON AG are listed on the Frankfurt Stock Exchange (ISIN: DE000A3E5C08).	codon.de
Condio GmbH	
We develop and produce natural stabilizers and food ingredients tailor-made to your needs. We deliver solutions for your products and optimize recipes and technologies.	condio.com
CONGEN Biotechnologie GmbH	
CONGEN is specialized in food testing by molecular analytics based on DNA and RNA detection. CONGEN has been a pioneer for over a decade in the development and application of food and feed analytics by real-time PCR. The methods are available as complete analytic kit as well as a Service. Our mission is to serve the food industry with an excellent service and with standardized and reliable test kits in order to realize highest possible food safety and food quality.	congen.de
Cyano Biotech GmbH	
Cyano Biotech develops bioactive Natural Products from cyanobacteria towards active ingredients for the pharma -, agro- and cosmetic industry. Using its proprietary platform technology the company focuses on novel, patented payloads of Next Gen Antibody-Drug Conjugates (ADC).	cyano-biotech.com
Demecan GmbH	
DEMECAN GmbH is a company founded in 2017 and based in Berlin, whose object is the cultivation, further processing, storage, packaging and delivery of cannabis for medical purposes.	demecan.de
DendroPharm GmbH	
Dendropharm manufactures novel excipients and nanotech drugs and offers CDMO Services – contract development and manufacturing. Using Dendropharm's proprietary technology we enable drug significant enhancement of drug penetration enhancement and bioavailability for topical and iv drugs. We offer the production of small scale batches of liquid and semisolid formulations under GMP conditions for clinical trials and production ramp up. Analytical methods: in-vitro skin penetration testing, static and dynamic light scattering, zeta potential, HPCL/ GPC, viscosimetric/reometric, high resolution GPC-light scattering methods to determine mass and radius of nanomaterials and biomaterials.	dendropharm.de
DexLeChem GmbH	
We are experts in the reactivation of complex chiral catalysts. For the first time the unmodified homogeneous catalyst can be re-used repeatedly thanks to our innovative water based process. Supported by quantum chemical analysis we are able to simulate catalytic cycles. Combined with our special knowhow this enables us to find the best solvent system for our customers. By using this new resource-efficient reaction route our customers – manufacturers of active pharmaceutical ingredients (APIs) and fragrances – gain two advantages: reduction of production costs and a more sustainable process.	dexlechem.com
Diaglobal GmbH	
Development, production and distribution of in vitro-diagnostics for analytical purpose and the distribution of medical products.	diaglobal.de
Diagnostic HealthCare Solutions GmbH	
DHS – Diagnostic HealthCare Solutions GmbH, a spin-off of the Charité, focuses on clinical performance evaluation and approval studies of medical devices for IVDR conformity. These include usability and near-patient testing of rapid antigen devices (e.g., POC) and validation studies of diagnostics kits (e.g., qPCR). We cooperate with Europe's largest CRO and have applied for ISO15189. Contract measurements, research and development projects, and scientific writing/editing services are possible.	dhs-lab.de
DIZG – Deutsches Institut für Zell- und Gewebeersatz gGmbH	
DIZG is a Berlin-based manufacturer of human tissue transplants. The institute manufactures allogenic bone, skin, tendon, Fascia lata and amnion transplants. It also provides an autologous skin transplant service that is primarily focused on life-saving treatment of patients with large area severe burns. DIZG also conducts transplantation-based research and actively develops new transplants.	dizg.de

DMB-Diagnostics GmbH	
DMB has its focus on the quantitative detection of circulating tumor cells. This way we can monitor and predict the course of the disease whether a chemotherapy will work and when new tumor activity needs further treatment attention. A second business unit focus on the medical benefits of Cannabis medications in the recreational field as well as in the pharmaceutical area. Both combined will lead to new treatment possibilities for cancer treatment.	dmb-diagnostics.de
Dr. Bartetzko Umweltbiotechnik – Berlin UG	
Feasibility studies, development, planning, construction and operation of biotechnological plants for ground-water, process water and waste water purification. Accredited microbiological laboratory for the investigation of drinking water, groundwater, bath water, soils, food, anti-microbial active ingredients and sterility according to Ph.Eur, approved in accordance with BiostoffV and the German infection protection act (Infektionsschutzgesetz).	bartetzko.com
Dr. Lerche KG	
Innovative company engaged in development, production and marketing of specialized microcapsules for bio- and medical technology - Development and production of novel DNA-Purification-Kits with proprietary technology - Production and marketing of microcapsules (LUMiTainer), microbeads and cell based sedimentation standards for blood analysis (Sedi-Val ESR standards) - Encapsulation of cells - Contract analysis for characterization of microcapsules, porous membranes and hollow fibres.	lerche-biotec.com
Dr. Otto GmbH	
Handling with research and development of ecological products its process of development also its production and marketing - Production and refinement of plantingredients - Operate an analytical laboratory of renewable resources and chem. Analysis.	dr-otto-gmbh.de
Dr. Rölleke Labor für Genetische Analytik GmbH	
Dr. Roelleke is specialized on the identification of microorganisms, particularly in the area of food safety. Furthermore, Dr. Roelleke is authorized expert on paternity tests for courts and the private sector.	dr-roelleke.de
E.R.D.E.-AAK-Diagnostik GmbH	
The laboratory is specializes in the diagnostic of agonistic autoantibodies in Dementia, DCM, Hypertension, Diabetes Typ 2, Allograft Rejection, Dialysis assoc. Diseases, Glaucoma and POTS. The laboratory has 3 validated independent test methods for the analysis of agonistic autoantibodies. Patients will benefit - at a given agonistic autoantibodies indication from personalized, specific medicamentous therapy which accounts for the autoantibodies induced malfunction of receptors. Numerous publications have described the pathological potential and prevalence of agonist autoantibodies. All publications are available on our homepage.	aak-diagnostik.de
Eagle Genomics Germany GmbH	
Eagle Genomics is a global Deep Tech software business with a location in Potsdam Science Park, Germany. Its award-winning AI-augmented knowledge discovery platform, e[datascientist], integrates and streamlines access to datasets and facilitates multi-causal analysis of multiomics data. In this way, the platform allows scientists to efficiently exploit multi-dimensional data, gaining insights in minutes rather than months. The company is also building a global knowledge partner network with key microbiome research institutions.	eaglegenomics.com
emp BIOTECH GmbH	
Production of fluorescent dyes and chemiluminescent reagents. Contract chemical synthesis of small molecules. Contract labeling and purification of proteins, antibodies and oligonucleotides. Production of size-exclusion gels, columns and filter plates. Production of high quality reagents for DNA synthesis.	empbiotech.com
engine GmbH	
We provide a range of protein arrays with up to 27,648 in situ expressed proteins enabling you to perform autoantibody profiling and biomarker discovery or to explore protein/DNA/RNA-protein interactions. Our arrays can be customized to meet your needs with respect to number and type of protein as well as specific modifications thereof (e.g. citrullination). We set value on a dedicated scientific support.	engine-gmbh.de
EpiBlok Therapeutics GmbH	
EpiBlok was founded in 2022 as spin-off from Charité in Berlin. We develop AAV-based gene therapies for treatment of drug-resistant focal epilepsy.	epiblok.com
Epigenomics AG	
Development and commercialization of innovative molecular diagnostic test products based on DNA methylation for cancer screening and for cancer specialty applications.	epigenomics.com

Epimune GmbH	
Epimune is a molecular diagnostic company pioneering epigenetic immune cell quantification. Using a drop of fresh, frozen or dried blood, Epimune's tests detect primary immunodeficiencies in newborns, children, and adults, to enable early and effective treatment. The company also develops products to diagnose Non-Hodgkin Lymphoma and to predict graft versus host disease and graft rejection.	epimune-dx.com
epinamics GmbH	
Epinamics GmbH, a newly established Berlin based pharmaceutical research and development dedicated company, is owner of a proprietary film forming formulation technology platform, the Invisible Patch system. The system is offering a broad basis for the development of formulations for treatment of dermatological diseases as well as for the development of transdermal systems.	epinamics.com
Epiontis GmbH, part of Precision for Medicine	
Precision Medicine Group is an integrated team of experts in fields from advanced lab sciences to translational informatics, clinical trial delivery, and regulatory affairs, payer insights to marketing communications. Together, we help our pharmaceutical and life-sciences clients conquer product development and commercialization challenges in a rapidly evolving environment.	epiontis.com
Epo Experimentelle Pharmakologie & Onkologie GmbH	
Based on more than 25 years of experience, EPO is offering customized oncology and immuno-oncology services for the preclinical development of novel anti-cancer drugs. Our portfolio includes more than 600 well characterized PDX models for studies in immuno-deficient or humanized backgrounds. EPO is your partner for tumor imaging, radio-oncology research and complimentary in vitro studies in two and 3D. The company also provides experimental pathology and histopathology services and consultation.	epo-berlin.com
Eternygen GmbH	
Eternygen is a Berlin based start up founded in June 2012 focusing on research, development and marketing of innovative drugs using a network of renowned scientists and contract research organizations. The main focus of Eternygen's development and core competences of its founders are research and development of new drugs for dietary-related metabolic diseases with dramatically increasing prevalences in the last decades.	eternygen.com
Eurofins SOFIA GmbH	
InVivo is a leading contract manufacturer in Europe, with 25 years of experience in mammalian cell culture and protein production. The expansive service portfolio includes monoclonal antibody production from hybridoma lines and various antibody services, plus recombinant antibody and protein production in different expression systems (HEK, CHO, E. coli). This allows maximum flexibility for every project. As ISO 9001 and ISO13485 certified company, we always aim for the highest quality standard.	eurofins.de
EUROVIR® Hygiene-Institut	
Laboratory service for testing the efficiency of products against viruses (virucides) and of processes for inactivating or eliminating viruses (virus safety).	eurovir.de
Evestra GmbH	
EVESTRA is a newly founded biotech company focusing on developing female health products. The companies expertise resides with steroid chemistry and biology. EVESTRA's product pipeline includes products for contraception, hormone replacement therapy, gynecological disorders and hormon dependent cancers.	evestra.com
fermtec GmbH	
Development of non-alcoholic beverages, beers and beer mix beverages, lactic acid fermentation, innovative foods and beverages and auxiliary substances for the food industry.	fermtecgmbh.de
Formula Pharmazeutische und chemische Entwicklungsgesellschaft mbH	
Galenical development of liquids and solid formulations Lyophilization Technology also applicable for biochemical products Granulation, drying and coating using fluid bed drying-technology, tableting Development and validation of analytical methods including UPLC Stability testing (ICH / GMP related to on going) Import of medicinal products from non-EU-countries, manufacturing, quality control (re-test) and release for market in accordance with §16 AMWHV for medicinal products and clinical supplies GMP-certificat / Manufacturing license in accordance with §13 AMG.	formula-pharma.de
Frankenförder Forschungsgesellschaft mbH	
The Frankenförder Forschungsgesellschaft is a research partner for small and medium-sized enterprises and mainly deals with research and development projects in the core competencies of agriculture, veterinary medicine and nutrition.	frankenfoerder-fg.de

FyonBio GmbH	
We are the contract development organization and clinical lab spin-out from Glycotope offering >20 years of experience in developing biopharmaceuticals to customers. As ISO 9001 certified company operating in part under GCLP we provide: One-stop shop from clone development to RCB for CHO and GlycoExpress® cell lines, incl. USP and DSP process development; Excellent know-how in glycobiology, bioassay development and clinical bioanalysis (immunogenicity, PK, biomarker).	fyonbio.com
GA Generic Assays GmbH	
Development, manufacturing and distributing of in vitro-tests, focussing on autoimmune diseases, hereditary and infections diseases.	genericassays.com
GBD Gesellschaft für Biotechnologische Diagnostik mbH	
GBD "Gesellschaft für Biotechnologische Diagnostik mbH" is an internationally active company that specializes as a virological-scientific institute in the manufacturing of customized quality control samples for virus diagnostics and other areas of laboratory diagnostics. We have been successful on the market for more than 30 years - with scientific ambition, practical know-how and very high quality-standards.	gbd-biotechdia.de
Gematria Test Lab GmbH	
GEMATRIA Test Lab GmbH is an expert in free radical research. By using Electron Spin Resonance (ESR) spectroscopy we offer analytical support and claim substantiation for cosmetic, pharmaceutical and nutritional products and technologies. Peroxidation processes, antioxidant performance, selection of raw materials, shelf life prolongation of sensitive products, performance of sunscreens, penetration of actives into skin and hair and anti-pollution efficacy are examples of our broad spectrum of experience.	gematria-test-lab.com
GENETEK BIOPHARMA GmbH	
Through our production of high quality genetic diagnostic kits – for hereditary genetic diseases and chromosomal anomalies detection and our efficient Human DNA profiling kits, used in forensics and/or kinship issues, we envision a better society, bringing safety and assurance to the world we live in.	genetek-biopharma.com
GenExpress Gesellschaft für Proteindesign GmbH	
GenExpress is a flexible company providing services in molecular biology. For over a decade we have successfully worked for customers in clinical laboratories, research institutions and the industry. We offer cloning of PCR targets, preparation of synthetic genes, expression of proteins, evaluation of LightCycler® assays, furthermore production of internal controls and standards for Real Time PCR systems, also cloning, expression and purification of proteins.	genexpress.de
Genosynth GmbH	
GenoSynth GmbH is a "Chemistry-R&D" company, which was founded by team of experienced scientists and business developers. We offer our professional expertise and services in chemical research and synthesis of organic compounds. Your partner, driving for success.	genosynth.com
GILUPI GmbH	
GILUPI is a medical diagnostics company with an initial focus on the prenatal and cancer market. The company is developing an innovative new diagnostic product based on nanotechnology. Our goal is to catch specific cells, which can be found only in very low concentration in the blood. The first application for our new nanosensor device will be prenatal diagnoses of chromosomal aberration out of maternal blood. The second application will focus on the early diagnosis of cancer.	gilupi.com
Glyco Universe GmbH & Co. KGaA	
GlycoUniverse GmbH & Co KGaA is a technology spin-off of the Max Planck Institute of Colloids and Interfaces. Registered on 10th October 2013, the company deals with the automated development and synthetic production of complex sugars and is seeking customers and collaboration with leading scientific institutes in Europe and world-wide.	glycouniverse.de
GLYCON Biochemicals GmbH	
Production of carbohydrate components used for the synthesis of new pharmaceutical compounds or diagnostics.	glycon.de
Glycotope GmbH	
Glycotope GmbH is a biotechnology company utilizing a proprietary technology platform to develop uniquely tumor-specific monoclonal antibodies. The company combines expertise in glycobiology and know-how in antibody development to advance first-in-class antibody-based therapeutics for (immuno)-oncology. Our antibodies target specific tumor-associated carbohydrate structures or protein/carbohydrate combined glyco-epitopes (GlycoTargets). Based on their superior tumor-specificity, these antibodies are suitable for development in an array of different modes of action including naked antibodies, bispecifics, antibody-drug-conjugates, cellular therapies or fusion-proteins.	glycotope.com

GQ Biotherapeutics	
GQ Biotherapeutics is a biotech company focused on the development of innovative gene therapies for treatment of musculoskeletal disorders. GQ uses its unique gene therapy platform to establish sustained production of therapeutic proteins locally in the tissues or organs where they are needed. Currently, GQ is developing disease-modifying gene therapies for osteoarthritis and intervertebral disc degeneration – both indications for which currently only symptomatic medical treatments are available. GQ is headquartered in Hamburg, Germany and has sites in Luckenwalde (Brandenburg), Germany and Liège, Belgium.	genequine.com
Green Elephant Biotech GmbH	
We make biotech more sustainable by reducing waste and CO2 emissions. With innovative solutions we tackle the global manufacturing capacity crunch in adherent cell cultivation. Our product CellScrew® is a novel flask for adherent cell cultures that offers a large growth area and requires less manual labour and space than stack systems. All our products are made 100% from plant-based materials	greenelephantbiotech.com
GrownValve GmbH	
GrOwnValve develops a lifelong solution for patients with congenital heart valve diseases. The GrOwnValve-technology gives interventionists the game-changing option to treat their patients with autologous heart valves, customized to the patients need: The heart valve prosthesis can be manufactured by heart teams worldwide using a 'GrOwnValve Procedure Pack' in the OR during one single procedure. In this intervention, the patient's own pericardial tissue is 3D shaped into a customized autologous heart valve and subsequently implanted minimally invasively.	grownvalve.com
HealthTwist GmbH	
HealthTwist is offering services in data science. Every step of research and development from early planning phases to final reports contains elements of statistical modeling and needs to be made reproducible. Furthermore, we provide customized seminars on basic and advanced statistical analyses as well as introductory classes in the use of R, a script language becoming increasingly the standard tool in scientific data analytics.	healthtwist.de
Hemafund Europe	
Hemafund Europe is a Cord blood bank for postnatal human cells and tissues. Our service includes collecting, processing, and storing cells and tissues required for clinical studies or treatment, and the cold chain logistics. We also offer Patients advocacy and referral service for advanced medical treatment centers.	hemafund.com
HS Diagnostics GmbH	
With our patented TCRsafe® system we deliver best-in-class quantitative T-cell receptor (TCR) repertoire analyses from tissues, FFPE or DNA samples. T-cell spectra comparison between tissues, time points etc. is one of our typical services, which can be completed with single-cell TCR and gene expression analysis. We are able to identify tumor-specific TCRs in an antigen agnostic proprietary approach and are offering special collections of tumor-specific TCRs for therapeutic applications.	hsdiagnostics.de
hybrotec GmbH	
Hybrotec GmbH is specialized in the development of monoclonal antibodies and immunoassays (preferably homogenous assays) as customs service. Our main focus lies on antibodies binding low molecular weight substances (e.g. toxins, fluorophores, hormones) as well as antibodies against novel proteins.	hybrotec.com
Hygiena Diagnostics GmbH	
Hygiena Diagnostics has been well known as a qualified partner in the field of molecular and microbiology for the last 20 years. We focus on development, production and marketing of PCR-based rapid detection systems. Hygiena Diagnostics offers solutions for the food and beverage industry, for the veterinary sector as well as for producers of pharmaceuticals and cosmetics.	hygiena.com
IDrug GmbH	
IDrug supports business strategies with innovative methodologies in analytical and biopharmaceutical chemistry.	idrug.de
Ifp Institut für Produktqualität GmbH	
Ifp Institut für Produktqualität is an accredited and GMP-certified laboratory for state-of-the-art analyses for the food, water and pharmaceutical industry. The company functions as a competence centre for comprehensive analytical services. It also develops and produces innovative, worldwide distributed products for the detection or determination of vitamins, allergens, pathogens, GMO and other substances.	produktqualitaet.com
IGV Institut für Getreideverarbeitung GmbH	
The range of services offered by the Biotechnology Division of the private research IGV GmbH institute is based on 25 years of experience in R&D for the cultivation of phototropic micro-organisms. Excellent, worldwide contacts to biomass producers, food producers, to the pharmaceutical and cosmetics and energy industry provide the fundament for innovative, market-oriented developments. In focus are development of photo bioreactor technology and active substances from algae.	igv-gmbh.de

IKDT – Institut Kardiale Diagnostik und Therapie GmbH	
IKDT was founded in August 2002 in Berlin-Steglitz and is one of the leading laboratories on Viral Infections of Heart Muscle Tissue and Dilated Cardiomyopathy (DCM) in Germany. IKDT lab is performing a comprehensive molecular diagnostic examination of endomyocardial biopsies as one of a limited number of specialized cardiological labs worldwide. Its service enables physicians firstly to start an efficient, pathophysiologically based causal therapy.	ikdt.de
Illumina Solution Center Berlin	
At Illumina, our goal is to apply innovative technologies to the analysis of genetic variation and function, making studies possible that were not even imaginable just a few years ago. Illumina innovative sequencing and array technologies are fueling groundbreaking advancements in life science research, translational and consumer genomics, and molecular diagnostics.	emea.illumina.com
Immutep GmbH	
We are global leaders in the understanding and development of therapeutics that relate to Lymphocyte Activation Gene-3 or "LAG-3" which is a cell surface molecule that plays a vital role in regulating the immune system. LAG-3 was discovered by our Chief Scientific Officer and Chief Medical Officer Dr. Frederic Triebel, putting Immutep at the forefront of immunotherapy drugs for cancer and autoimmune diseases. Our objective is to harness and strengthen the power of the body's own immune system through therapeutic intervention for the benefit of patients' health. This is how immunotherapy fights cancer and autoimmune disease.	immutep.com
in.vent DIAGNOSTICA GMBH	
in.vent DIAGNOSTICA GMBH is a biomedical company. We are focused on the project-oriented provision, processing and distribution of biological raw material for development and production of diagnostics and control material. We are your reliable partner for the customised development of assays for medical in vitro-diagnostics.	inventdiagnostica.de
inbion GmbH	
inbion GmbH provides services to support research in the interface between university, students and industry. For companies, we provide the benefit of outsourcing projects quickly and cost-efficiently to competent teams. Cooperation with research groups in the university is also facilitated, so that targeted knowledge transfer can take place here.	inbion.de
Invicol GmbH	
Invicol develops a platform technology for the isolation of rare circulating cells and exosomes from the peripheral venous blood stream. The minimally invasive medical device can be coated with different antibodies to target specific antigens present on the target cells. The quantification and characterization of these cells can be used to personalize patient treatment in cardiology and oncology.	invicol.com
Invitek Molecular GmbH	
Invitek Molecular develops and commercializes tailor-made nucleic acid purification solutions that enable DNA/RNA extraction from virtually any sample material. We provide customized development and contract manufacturing services to in-vitro diagnostics companies. Our custom and industrial solutions cover all challenges from the idea up to the realization of a marketable product according to CE-IVD. We are passionate to create success for your project.	invitek.de
InVivo BioTech Services GmbH	
InVivo is a leading contract manufacturer in Europe, with 25 years of experience in mammalian cell culture and protein production. The expansive service portfolio includes monoclonal antibody production from hybridoma lines and various antibody services, plus recombinant antibody and protein production in different expression systems (HEK, CHO, E. coli). This allows maximum flexibility for every project. As ISO 9001 and ISO13485 certified company, we always aim for the highest quality standard.	invivo.de
InvivoContrast GmbH	
InvivoContrast provides globally high quality MRI (Magnetic Resonance Imaging) contrast agents and professional support for preclinical imaging in academic and commercial institutions.	invivocontrast.com
IST Innuscreen GmbH	
Founded in 2005, IST Innuscreen GmbH specializes in the field of nucleic acid isolation and purification, molecular diagnostics including molecular biology reagents. The company offers a broad product portfolio of kits, assays and reagents - including kits and assays for PCR and qPCR/real-time PCR. Located in Berlin, the company is certified for ISO EN13485. In 2020, AJ Innuscreen GmbH was acquired by Innovative Sensor Technology IST AG and renamed IST Innuscreen GmbH.	ist-innuscreen.de

JPT Peptide Technologies GmbH	
JPT is an ISO 9001:2015 certified provider of custom peptides, innovative peptide products and services and a partner for research projects focusing on development of cell and immunotherapy, vaccine development, immune monitoring & diagnostics. JPT has developed a portfolio of proprietary technologies and a series of unique catalog and customized products, which support a worldwide customer base in the pharma and biotech industries as well as non-profit research organizations and universities.	jpt.com
Kairos GmbH	
Kairos is a renowned IT-specialist, with more than 10 years of experience in the development of IT-system solutions for the health care sector. On the basis of special knowledge in the implementation of medical middleware platforms, CentraXX was created as a multi-centric research portal combining structured research content with the modules of biobanking and study management.	kairos.us
KNAUER Wissenschaftliche Geräte GmbH	
KNAUER develops and produces laboratory instruments in Berlin and is best known for liquid chromatography systems and components. These are used to separate molecules. The systems serve analytical purposes as well as the purification of valuable substances, such as proteins or active pharmaceutical ingredients. High-pressure dosing and customized engineering solutions are other important business areas. Latest development is equipment for lipid nanoparticle production, like for corona mRNA vaccines.	knauer.net
Kupando GmbH	
KUPANDO is a pioneering biopharmaceutical company developing a TLR 4/7 agonist that stimulates innate immunity. The proprietary drug candidate is ideally suited for the systemic treatment of solid tumors (tissue agnostic), the topical treatment of selected cancers (bladder and skin), the prevention of infectious diseases and as vaccine adjuvant. In oncology, our drug candidate has the potential to be used as a stand-alone treatment for solid tumors or in combination with other drugs. In vivo studies have shown so far comparable efficacy, a better safety profile and a synergistic/additive effect to checkpoint inhibitors.	kupando.com
Labforward GmbH	
Labforward GmbH develops and distributes digitization solutions and software for research and analysis laboratories. Our product labfolder is a data management platform for laboratory teams and with our product cubuslab we provide an IoT solution for laboratories, with which manufacturer-independent laboratory equipment can be monitored and data collected. Our solutions are used by more than 160 customer organizations worldwide (including renowned research organizations such as Charité, Max Planck Society, NIH, Bayer, BASF, WuXi AppTec and many more). To support our customers in their digitization we work together with renowned strategic partners.	labforward.io
Labor Berlin – Charité Vivantes GmbH	
Labor Berlin Services is the service subsidiary of Europe's largest hospital laboratory for clinical pathology and offers complete solutions for any kind of testing for the ivd industry, CROs, the pharmaceutical industry, life science companies and research facilities, while Labor Berlin is the exclusive laboratory partner of Charité - Universitätsmedizin Berlin and the Vivantes Network for Health. Labor Berlin and Labor Berlin Services both perform over 35 million analyses in clinical pathology per year and provide the diagnostic services for approximately 400.000 in-house patients a day and some one million out-patients per year.	laborberlin.com
Leonyte Biosystems GmbH	
Leonyte Biosystems develops cutting-edge technologies to provide you with real-time bacteria tests. The technology is currently focused primarily on Food Safety, but the potential is far beyond that.	leonyte.com
LGC Genomics GmbH	
LGC Genomics is the division of LGC with specific expertise in high quality, cutting-edge genomic and related services and products. LGC Genomics delivers:- Next generation sequencing services- DNA sequencing- Genomics services- Nucleic acid extraction services- DNA extraction products. LGC is an international science-based company and market leader in analytical, forensic and diagnostic services and reference standards (www.lgc.co.uk).	lgcgenomics.com
LGC GmbH	
Production of calibration substances for purity testing of drugs.	lgcstandards.com
LifeGlimmer GmbH	
LifeGlimmer is a customer-oriented contract research company providing the biotechnological, medical and environmental research communities an efficient way to outsource scientific modeling and computational needs. The SME uses its expertise in statistics, incl. machine learning and AI, to develop decision support systems and digital twins that are translated into tailored user applications. LifeGlimmer has a proven track record of managing transdisciplinary and transnational research projects	lifeglimmer.com

LIMETEC Biotechnologies GmbH	
The core competence lies in the development of high-speed and high-quality proof systems for the detection of pathogens, as well as in the allelic discrimination of hereditary diseases. All products are marked with the CE-Certificate. The second area of expertise is the creation of communication networks which connect outpatient and hospital patient treatments, intensify data exchange and provide information to all health institutions, thus establishing partner relationships between them.	limetec-biotechnologies.de
LIPIDOMIX GmbH	
LC/MS/MS based high trouput analytic of lipid mediators and metabolites. Analytical method development, analytical support for LC/MS/MS in life science, food safety, forensic science.	lipidomix.de
LUM GmbH	
LUM GmbH was founded in 1994 by Prof. Dr. Dr. Lerche as an innovative corporation with headquarters in Berlin, Germany. LUM has an office and application lab in France and 3 subsidiaries, in USA, China, Japan. Scientific and measurement technology expertise has been obtained for decades in: <ul style="list-style-type: none"> • Particle characterization • Analysis of suspensions and emulsions • Determination of adhesive and bonding strengths • Quality assurance and process optimization. 	lum-gmbh.de
LXP Group GmbH	
LXP Group GmbH is active in the development, marketing and licensing of technical solutions for the recycling of plant residues under the conditions of closed carbon and mineral cycles.	lxp-group.com
M2-Automation GmbH	
We will provide you with the perfect tailored solution to your automation needs, when you choose to share in the benefits of our experience and expertise in biotechnology engineering, development and applications.	m2-automation.de
M24You GmbH	
M24You GmbH offers wide range of microdispensing and ultra low volume liquid handling instruments for contact printing and non-contact spotting. Next to the dispensing technology, we provide you with state-of-the-art microarray readers. Beyond selling ultra fast dispensing instruments, we offer you an initial demo spotting and contract manufacturing services. Our scientific background allows us to understand your unique applications and supply you with the best dispensing solution.	m24you.com
MagForce AG	
MagForce AG is a leading medical technology company focusing on nanomedicine in oncology. The company's proprietary procedure, NanoTherm® therapy, enables the targeted treatment of solid tumors through the intratumoral generation of heat via activation of magnetic nanoparticles. NanoTherm®, NanoPlan®, and NanoActivator™ are components of the therapy and have received EU-wide regulatory approval as medical devices for the treatment of brain tumors.	magforce.com
MedInnovation GmbH	
MedInnovation GmbH has developed a new method and a special ESR-analyzer, which for the first time allows a simple routine laboratory test for evaluation of functional characteristics of plasma proteins. This albumin-functionality test opens a reliable possibility for cancer diagnostic as well as for disease progression monitoring of patients with liver diseases or sepsis.	medinnovation.de
Medipan GmbH	
Development, manufacturing and international distribution of radioactive (125J-IRMA) and non-radioactive (Elisa) in vitro-diagnostic tests, covering the field of Autoimmunity, mainly in Thyroid and Diabetes Typ 1 and automated interpretation of cell-based immunofluorescence tests by the AKLIDES system.	medipan.de
MerLion Pharmaceuticals GmbH	
The business purpose of the Company is the research, production, optimization and the development by way of pre-clinical as well as clinical trials of new molecules for the treatment of infectious diseases.	merlionpharma.com
Metasysx GmbH	
MetaSysX GmbH offers comprehensive system biology analytics. Our services ranging from metabolomics (metabolite and lipid), proteomics (targeted and un-targeted), protein-small chemical molecule interaction and validation (targeted and un-targeted) and genomic as well as transcriptomic analysis (NGS outsourced). In our laboratories, biotechnology meets the computer science and applied mathematics.	metasysx.com
MetrioPharm AG	
MetrioPharm AG is a clinical-stage biopharmaceutical development company focused on therapies for acute and chronic inflammatory diseases. MetrioPharm is developing a novel class of self	metriopharm.com

mfd Diagnostics GmbH	
The mfd Diagnostics GmbH (BT Luckenwalde) is a life science research and development company for diagnostic and therapeutic application of innovative laser technologies. The main advantages of the developed technologies are the non-/minimally-invasive measurement methods, the non-artificial approach and the possibility of real-time measurement. Therefore, those are promising tools for the diagnosis and therapy monitoring in the neurological practice and in the perinatal surveillance.	mfd-diagnostics.com
micro resist technology GmbH	
We are a leading company in the development and production of innovative photoresists, polymers and photopolymers as well as complementary process chemicals for lithographic manufacturing processes in micro- and nanostructuring. We offer materials for key technologies such as microsystems technology, photonics, micro- and nanotechnology, nanoimprinting as well as life sciences, micro fluidics and 3D-printing. As a company actively performing R&D in these fields we are interested in cooperation.	microresist.de
MicroDiscovery GmbH	
MicroDiscovery GmbH is a leading provider of high quality software for biomolecular research, innovative diagnostics and personalised medicine. The Company also develops hardware tools in the area of innovative diagnostics, biomedical research and personalized medicine. MicroDiscovery GmbH is ISO 9001 certified by TÜV Rheinland and has a strong track record in creating software systems in accordance with relevant regulatory directives for the life science and IVD industry. Customised services ranging from biostatistical data analysis to bioinformatical design and support of complex research projects complete the product line of MicroDiscovery.	microdiscovery.de
microParticles GmbH	
Development, manufacture, surface modification and characterization of mono-disperse polymer particles in the nano- and micrometer range. In addition to classic polystyrol and polyacrylate-based polymer particles, microparticles GmbH has launched new melamine resin particles on the market with exceptional chemical and physical qualities. The main areas of application are in particle measurement technology, medicine, biochemistry and microelectronics etc.	microparticles.de
MiGenTra GmbH	
MiGenTra was founded in 2021 by ProBioGen and Minapharm Pharmaceuticals for the development and commercialization of high quality affordable biologic medicines in the field of Biosimilars, Cell- and Gene Therapies (CGT) and Vaccines to serve the needs of patients across Africa and the Middle East. MiGenTra is leveraging the strong development and manufacturing capabilities of parent companies ProBioGen and Minapharm as well as on the excellent market position of Minapharm in the region.	migentra.com
Minerva Analytix GmbH	
Minerva Analytix GmbH is a leading analytical service lab for the control of microbial contamination. Our core competence lies in the control of mycoplasma, bacteria and viruses in cell cultures and biopharmaceuticals.	minerva-analytix.com
Minerva Biolabs GmbH	
Our core competence is detecting and controlling microbial contamination in cell cultures and biopharmaceuticals. In addition, we offer specialized PCR kits and reagents for the screening of drinking water for germs and the quality assurance of halal and vegan products. Products for the qualification of PCR cyclers or the removal of DNA contaminations in the PCR laboratory complete our product portfolio. We also offer Contract Manufacturing of molecular biology-based IVDs and reagents.	minerva-biolabs.com
MLB Mikrobiologisches Labor GmbH	
Accredited test laboratory for drinking water, clean rooms, sterility, bioburdens, D-PL-13398-01-00, EN 17025. Accreditation according to VDI 6022.	mlb-mikroberlin.de
MoKi-Analytics GmbH	
MoKi Analytics GmbH offers services and products for the molecular detection of microorganisms using FISH (Fluorescence in situ hybridization). Our expertise is the sensitive and specific visualization and quantification of microbial biofilms in tissue samples and in vitro models. This includes measurement of the effectiveness of antimicrobial substances against biofilms, for example on coated implants or medical surfaces.	moki-analytics.com
Molnar Institut für angewandte Chromatographie	
Founded in 1981, Molnár-Institute develops DryLab®, a software for sophisticated U(H)PLC method development. Analytical scientists use it to model chromatographic interactions, retention times, robustness while conforming to QbD standards. Being registered vendor to US FDA, CDC, and other agencies, Molnár and DryLab® have pioneered Analytical Quality by Design long before regulatory agencies worldwide encouraged QbD submissions. Widely implemented among thought leaders, DryLab® contributes substantially to the paradigm shift towards a science-based perspective on HPLC quality management.	molnar-institute.com

moloX GmbH	
moloX GmbH is a company focusing on custom protein production in bacterial and insect cell expression systems and subsequent protein purification to ultra-high purity. On customer demand a team of experts can perform protein crystallization experiments and determine the 3D structure of target proteins by X-ray crystallography.	molox.de
MRI.TOOLS GmbH	
MRI.TOOLS's main focus is the development, sales and services of innovative hardware and novel technology for magnetic resonance imaging (MRI), computed tomography (CT) and positron emission tomography (PET). Our product portfolio encompasses enabling radiofrequency (RF) coils tailored for a broad range of applications, devices designed for reliable cardiac gating of imaging plus accessories that will make your daily life more comfortable. MRI.TOOLS is also very proud to offer consulting services such as validation and certification of medical devices.	mrtools.de
Myelo Therapeutics GmbH	
Myelo Therapeutics GmbH is a clinical-stage pharmaceutical company focused on developing medical countermeasures (MCM) and therapies in cancer supportive care. It closely collaborates with the U.S. National Institute of Allergy and Infectious Diseases / National Institutes of Health and European Institutions to advance MCMs against radiological and nuclear threats. Its lead candidate is a clinical-stage small molecule technology in development as adjuvant cancer therapy for the treatment of radio-/ chemotherapy myelosuppression and medical countermeasure for acute radiation syndrome.	myelotherapeutics.com
Nanalytics Gesellschaft für Kolloidanalytik mbH	
We are a contract laboratory specializing in the physico-chemical characterization of pharmaceutical proteins, biopolymers, nanoparticles and colloidal systems. Our core-competences are Analytical Ultracentrifugation, in combination with Static and Dynamic Light Scattering as well as spectroscopic (CD, fluorescence) and thermodynamic techniques (ITC, DSC).	nanolytics.de
Nanalytics Instruments GmbH	
Nanalytics Instruments has emerged from Nanolytics, a company committed to analytical services on nanoparticles and macromolecules, both synthetic and biological. Analytical Ultracentrifugation has been Nanolytics' core competence from the start in 1999.	nanolytics-instruments.com
nanoPET Pharma GmbH	
As a technology and service provider to the biopharmaceutical industry, nanoPET Pharma focuses on the R&D, production as well as marketing of innovative agents for Diagnostic Imaging. The company offers an exciting product portfolio of specialized preclinical imaging agents covering the principal diagnostic modalities (MRI, CT, Ultrasound and Optical Imaging) under the brand name Viscover™ (www.viscover.berlin). With more than 20 years experience in the field of diagnostic imaging, the company also offers consulting and contract research services. In addition, nanoPET Pharma pursues the clinical development of its patented core technology platform of inorganic nanoparticle PET tracers.	nanopet-pharma.com
new/era/mabs GmbH	
new/era/mabs GmbH provides all-round solutions for the generation and characterization of murine, camelid and human antibodies. The company offers a highly effective immunization and selection platform in order to combine antibody generation with a very early validation directly after fusion. The system allows the selection of antibody producing hybridomas 4times faster than with conventional hybridoma technology. With a worldwide patent-pending system we are now looking for reliable and competent business partners to market our platform and cell lines. The team of new/era/mabs provide an excellent background in antibody generation and characterization and is highly motivated to support your customized development.	neweramabs.com
nextplant UG	
nextplant UG is one of the world's leading companies in the clonal mass propagation of garden and outdoor orchids. The in vitro laboratory with open spaces supplies perennial nurseries with Cypripedium varieties and Dactylorhiza hybrids of all growth stages - as clone varieties or generatively propagated.	nextplant.de
NMI TT Pharmaservices	
NMI TT Pharmaservices is an established provider of non-clinical contract research services. For an ever-growing base of pharma, biotech and academic clients, the company has developed a comprehensive portfolio of protein profiling services (e.g. DigiWest®, RPPA, Luminex), custom cell services (e.g. custom stable cell lines, compound testing studies), and electrophysiology services.	nmi-tt.de/pharmaservices
Nostos Genomics GmbH	
Nostos Genomics offers a platform AION, that analyzes a person's DNA in less than 2 minutes to identify clinically relevant genetic variants. This enables genetic testing labs and physicians to gain actionable insights for their patients. It solves the bottleneck of hours of manual analysis of genetic data, the biggest obstacle to using this information for routine medical care.	nostos-genomics.com

NovaBiotec Dr. Fechter GmbH	
NovaBiotec Dr. Fechter GmbH is a planning and engineering office that specializes in examining buildings for biological and physical contaminants as well as chemical indoor pollutants, such as mold, dry rot, VOC, SVOC, MVOC, asbestos, PAH etc. By analyzing material, dust and room air samples, we detect contamination sources and the interior hygienic status. NovaBiotec also offers hygienic analyses and inspections for ventilation and air-conditioning systems.	novabiotec.de
Novozymes Berlin GmbH	
Novozymes is specialized in the research and development of the natural diversity of microorganisms. We explore the huge potential of microorganisms for the development of innovative and natural products.	novozymes.com
OakLabs GmbH	
OakLabs provides the most flexible products and services for large scale custom SNP genotyping on the market. OakLabs offers several formats for analysing a variable number of SNPs in any sequenced organism.	oak-labs.com
Octapharma GmbH	
Octapharma is the largest privately owned and independent plasma fractionator in the world. We develop and manufacture medicines for patients in the therapeutic area's haematology, immunotherapy and critical care. We focus our R&D efforts on disease areas showing significant need for better treatment options and where we believe our skills will help us achieve our vision of providing new health solutions advancing human life.	octapharma.com
OctreoPharm Sciences GmbH	
OctreoPharm Sciences GmbH is a clinical development company focusing on diagnostic radiopharmaceuticals.	ipson.com
Omeicos Therapeutics GmbH	
OMEICOS as a clinical stage company has industry-leading knowledge of omega-3 fatty acid metabolism and biology. Our small molecule compounds target one of nature's most important cell-protective pathways. Our lead compound OMT-28 proved its excellent safety and tolerability profile in Phase I and II in patients with Atrial Fibrillation. In addition, the clinical Phase II data demonstrated OMT-28's significant positive and broad effect on a number of important inflammatory and mitochondrial dysfunction biomarkers. OMEICOS focus' on developing therapies that have the potential for a significant impact on cardiovascular, inflammatory and mitochondrial diseases with high unmet need.	omeicos.com
ovalehn GmbH	
Production and application of specific recipes – containing IgY for diagnostics and oral, passive immune therapy.	
Pantherna Therapeutics GmbH	
Pantherna Therapeutics is a privately-held biopharmaceutical Company developing mRNA therapeutics for vascular and pulmonary diseases. Pantherna's innovative technology platform is based on advanced nanoparticles for the delivery and expression of therapeutic mRNA drugs in the endothelium and epithelium of the lung.	pantherna-therapeutics.com
peptides & elephants GmbH	
Since more than 20 years peptides&elephants is the trusted partner of immunologic researchers. Using its proprietary USPS® Technology's peptides&elephants is producing in Germany tailor made and off the shelf -peptide libraries and peptide pools for immunologic research and modern vaccine development.	peptides.de
PerformaNat GmbH	
PerformaNat develops novel feed additives for improved animal health with a focus on prevention of gastrointestinal diseases and metabolic disorders as well as boosting the immune system. PerformaNat's competitive advantage is based on a unique technology platform for identification and characterization of novel active ingredients.	performanat.de
PharmaSol GmbH	
Modification of ingredients or introduction of new metabolic pathways in plants with gene-technology methods.	pharmasol-berlin.de
Pharmio GmbH	
Pharmio enables quick and flexible manufacturing through modular and IoT-powered factories. Their container-sized and sensor-driven factories significantly reduce time-to-market for pharma / biotech companies while also reducing up-front investments with a production-as-a-service business model. Pharmio aims to democratize pharma manufacturing and to lower entry barriers especially for the growing number of SMEs - so they can launch their innovative pharmaceutical products as flexibly as needed in today's changing markets.	pharm.io

PlasmaChem GmbH	
PlasmaChem GmbH is an innovative R&D and manufacturing company specializing in nanomaterials, plasma- and ultra-thin film technologies. The company manufactures nano-coated medical implants (stents), nanomaterials, additives for metal plating (applied e.g. by Siemens AG), new additives to engine oils on the base of nanodiamonds and other industrial nanoproducs.	plasmachem.com
PolyAn GmbH	
PolyAn is a nanotechnology company specialized in the modification of surfaces using Molecular Surface Engineering (MSE). Since 1996 PolyAn develops and manufactures consumables for multiplex diagnostics and LifeScience research. Key product families are functionalized slides & coverslips for microarrays, fluorescent multiplex microparticles (beads) and reactive microplates for immunoassays.	poly-an.de
PRAMOMOLECULAR GmbH	
PRAMOMOLECULAR, a spin-off of the Technische Universität Berlin, is developing drug candidates for gene silencing through RNAi. Our lipid-based, covalent delivery technology enables efficient silencing in lung and pancreas with self-delivering siRNAs. PRAMO's therapeutic focus is on cancers with mutated RAS proteins as oncogenic drivers.	pramomolecular.com
preclinics certified products GmbH	
preclinics certified products GmbH (pcp) is a subsidiary of preclinics GmbH. We offer tailored development services through the whole process from antigen to antibody. Our focus is the production of customized virus-like particles for the use as reference material or as antigen for immunizations. We are experts in the generation of immune or naïve cDNA libraries for NGS or subcloning into display systems. In addition, pcp produces recombinant proteins and antibodies in various formats (IgG/VHH).	preclinics-pcp.com
preclinics Ges. f. präklinische Forschung mbH	
preclinics is a commercial cooperation partner for preclinical R&D. As a creative and experienced CRO, we offer preclinical models and methods for testing biological drugs and vaccines since 2007. "From antigen to preclinics" is the philosophy of our antibody discovery services. Beginning with innovative antigen constructs for gene, cell, and protein immunizations in many species (e.g. llamas/alpacas, cattle, and humanized rodents), we offer all services for the development of antibody-based products.	preclinics.com
ProBioGen AG	
ProBioGen is a Contract Development and Manufacturing Organization (CDMO) and Technology Provider, with extensive expertise in cell line engineering, process development (upstream- and downstream process) and GMP manufacturing of biopharmaceuticals. Offering state-of-the-art contract development and manufacturing services as well as access to proprietary cell lines (AGE1.cell lines) for the manufacturing of biopharmaceuticals and vaccines. The company possesses the manufacturing authorization from the competent authority and meets the quality standards required by the EMA and the FDA guidelines.	probiogen.de
Proteome Factory AG	
Biomarker & target discovery, validation, analysis of food and ingredients, absolute quantification of proteins and peptides, sequencing and characterization of proteins and antibodies (CDR), 2DE and LC-MS based proteomics studies, pharmacokinetics, pharmaco, immuno and membrane proteomics, protein identification, characterization of proteins and peptides (PTMs, e.g. phosphorylation, glycosilation), quality control, mass determination, N-terminal amino acid sequencing, silver staining kit etc.	proteome-factory.com
provitro AG	
Provitro stands for more than ten years of experience in commercialisation of cell culture technologies, tissue microarrays and immunohistochemical analyses backed up by scientific knowledge at the Pathological Institute of the Charité, Berlin. Based on our quality management system certified according to ISO 9001 and ISO 13485, we are prepared to provide our customers not only with high-quality products and state-of-the-art services but also with individual solutions for their specific needs.	proteome-factory.com
QMEDIS Analytics GmbH	
QMEDIS Analytics GmbH is an independent, private contract laboratory. We offer a wide range of analytical and galenic services as well as regulatory support for the pharma, medical technology, cosmetics and food industries. Our expertise includes medicinal products with chemically defined active substances, herbal preparations (with a focus on cannabis), novel and innovative drug formulations (using 2D printing technologies) and modern analysis techniques.	qmedisanalytics.com
Quantistry GmbH	
Quantistry provides an intuitive and cloud-based computational chemistry platform for highly innovative chemical and material research and development. Using quantum simulations, molecular dynamics and machine learning, our platform is based on a powerful combination of cutting-edge methods that enable our customers to develop better products, such as novel materials or new pharmaceutical ingredients, in less time.	quantistry.com

RAPIDOZYM Ges. für Laborhandel und und DNA Diagnostika mbH	
Expertise of cell biologists cell manufacturing and clean room technology specialists. Focuses on clinical stem cell product development portfolio are stroke, myocardial infarction and plastic surgery.	rapidozym.de
RIPAC-Labor GmbH	
RIPAC-LABOR offers high-quality diagnoses of bacterial infections, particularly in poultry, pigs and cattle, but also in other farm and domestic animals. The company uses pathogen differentiation to provide quick and effective methods for fighting pathogens. It performs resistance tests and epidemiological analyses and also focuses on producing herd-specific vaccines.	ripac-labor.de
Roboklon GmbH	
Distribution, Marketing and Development of Products for Molecular Biological Research and Genetic Engineering.	roboklon.com
ROVALAB	
Our Master Mixes for QPCR, Standard-, Hot Start- and High Fidelity PCR as well as our high quality critical raw materials and reagents such as DNA Polymerases and dNTPs are designed to help you successfully and rapidly solve your scientific and manufacturing tasks.	rovalab.com
scalable minds GmbH	
Scalable Minds develops software to manage, visualize, and process multi-terabyte 3D image datasets for Neuroscience, Cell Biology, Geology and Material Sciences.	scalableminds.com
SCIENION GmbH	
SCIENION is the leading manufacturer of high performance instruments for applications requiring precise deposition of biological content in low volumes. Our technology is ideally suited for loading of oligos, proteins, antibodies, and glycans onto diagnostics devices. Easy scale up is possible thanks to the same core technology engineered in all systems. We have recently developed a breakthrough technology allowing high throughput isolation of single cells.	scienion.com
selekt-ID BIOLABS GmbH	
The selekt ID Biolabs is a molecular biology service laboratory. The portfolio includes several PCR-based techniques detection methods: The core product is the identification of microorganisms (bacteria, yeasts, fungi) by sequence comparison of 16S respectively. Will also offer the detection of animal species in meat products and, as GMO analysis and detection of allergens.	selekt-id.de
SEPIAtec GmbH	
Seplatec GmbH develops separation systems based on high-performance liquid chromatography (HPLC) and supercritical fluid chromatography (SFC) technology, enabling our customers to speed up their separation and method development significantly. Seplatec systems are used around the world by major pharmaceutical and biotechnology companies as well as by numerous research institutes.	seplatec.com
SERAMUN Diagnostica GmbH	
Seramun Diagnostica GmbH is a leading substrate- and reagent producer in Europe. Its product range covers in vitro-diagnostics (IVD) for infectious, autoimmune and rheumatic diseases (e.g. Serazym®, SeraLine®, SeraSpot®) as well as vaccines purity testing solutions by ELISA and diagnostic tools (e.g. software, automation systems). Customized solutions cover protein and antibody development and purification, but also conjugation and labelling of antibodies to different dyes.	seramun.com
SGS Institut Fresenius GmbH	
Analytical laboratory services and consulting for development, production and quality control of drugs.	institut-fresenius.de
sifin diagnostics GmbH	
We are manufacturing and distributing worldwide our bacteriological test reagents for serotyping of Salmonella, Shigella, Yersinia, E. coli as well as culture media and blood grouping reagents. We do also offer a large variety of monoclonal antibodies. MICRONAUT is the trade mark of MERLIN's product line and exclusively available at sifin diagnostics gmbh.	sifin.de
Silence Therapeutics AG	
Silence Therapeutics AG is a leading RNAi therapeutics development company and offers a novel, proprietary siRNA technology (AtuRNAi) and proprietary systemic delivery systems for siRNA (AtuPLEX, DACC and DBTC). SILENCE pipeline consists of both partnered and internal programs of which 3 clinical phase II and 1 clinical phase I programs are partnered with Pfizer/Quark (2 ophthalmic indications) and Novartis/Quark (2 kidney indications). Silence?s internal lead compound Atu027 is currently in a Phase I clinical study for the treatment of solid tumours.	silence-therapeutics.com

SLM-Speziallabor für angewandte Mikrobiologie GmbH	
Microbiological quality control for medical devices, pharmaceuticals, cosmetics, drinking water, foodstuff, monitoring in clean rooms.	speziallabor.com
Solaga GmbH	
Solaga UG develops living wall elements with microalgae biofilms for sustainable improvement of indoor and outdoor air. These biofilms are used in various systems. In addition to self-sufficient images, which can be used for private air purification, we also produce water walls with integrated algae and cultivate entire house facades for biological air purification on a large scale.	solaga.de
SOPAT GmbH	
SOPAT is specialized in the analysis of particulate systems. The company develops and markets an innovative particle measurement technology consists of a tailor made SOPAT probe and innovative SOPAT software for real-time analysis of multi-phase systems. Particles, such as droplets, grains, cells or bubbles, are measured with high precision inline and in situ in running processes.	sopat.de
SphingoTec Therapeutics GmbH	
SphingoTec GmbH develops innovative biomarkers for diagnosis, prediction and monitoring of acute medical conditions, such as acute heart failure, acute kidney injury and circulatory shock, in order to support patient management and provide guidance for treatment strategies.	sphingotec.com
SunCoal Industries GmbH	
SunCoal develops and commercializes high-value carbon products like technical carbon, bio-based platform chemicals or biofuels using is hydrothermal treatment technology for biomass. In addition, SunCoal offers an innovative technical solution for the dewatering of organic sludges.	suncoal.com
Surflay Nanotec GmbH	
Surflay Nanotec GmbH is specialized on coating colloidal and planar materials with functional polymer films of nanometer thickness by the LbL-Technology®. Applications are in biofunctionalization, bio-sensing, diagnostic particles and encapsulation/controlled release of active ingredients. Surflay offers an unique range of customized multifunctional nanoparticles especially for Lateral Flow Assays as well as sensor-microparticles and fluorescence-labeled polymers.	surflay.com
Tacalyx GmbH	
Tacalyx, a spin-off from the MPICI, Potsdam, focuses on Tumor-Associated Carbohydrate Antigens (TACAs) as novel target class for cancer treatment. The highly tumor-specific expression of TACAs promotes metastasis, angiogenesis, and suppression of the immune system. Tacalyx uses sophisticated technology to synthesize highly pure TACA structures for the generation and identification of antibodies that will be developed into novel therapeutics for the treatment of cancer.	tacalyx.com
Targenomix GmbH	
Targenomix GmbH is a startup company with core competences in computational and systems biology, quantitative and molecular genetics, cell biology and biochemistry. One of the main research fields is the identification of interactions between molecular targets and small molecules.	targenomix.com
Thanares GmbH	
Development, use and marketing of analytical process for diagnostic and therapeutic purposes. Future business activities: detection process for bioactive substances in bodily fluids, isolation, characterization and investigation of bioactive compounds from plants, in particular insoluble proteins or low concentrations of proteins, development of low cost genetic systems for over-expression and/or production of such proteins.	thanares.com
The Sanity Group GmbH	
Sanity Group's purpose is to develop new cannabis-based pharmaceuticals and wellbeing products and to build the infrastructure to make them readily accessible and available to everyone, thus helping people living a healthier life.	sanitygroup.com
Thermo Fisher Scientific Clinical Diagnostics	
Thermo Scientific Biomarkers (B·R·A·H·M·S GmbH) explores, develops and produces new diagnostic test procedures to improve the diagnosis, and thereby the treatment, of life-threatening illnesses. This takes place with over 470 employees, in the disease areas infectiology, cardiology and pneumology as well as thyroid, autoimmunity and cardiology on the basis of our own patented biomarkers. Since October 2009 B·R·A·H·M·S GmbH is part of Thermo Fisher Scientific Inc. (NYSE: TMO), the world leader in serving science.	thermoscientific.com/brahms
Therycell GmbH	
At TheryCell we are using proprietary technologies to identify and select tumor-reactive T-cells for a novel type of TCR-T therapy. Our selection method works without prediction or knowledge of tumor antigens - in a purely individual and autologous manner. The T-cells selected and produced for therapeutic application are of highly predictable safety and efficacy. With clinical partners we are on the way to establish an innovative TCR-T therapy for solid tumors.	therycell.de

TIB MOLBIOL-Syntheselabor Berlin	
In 1990, TIB MOLBIOL became the first German manufacturer of oligonucleotides. In addition to designing and synthesizing primers and probes for Real-Time PCR assays, we develop and produce LightMix® Kits for Roche Diagnostics LightCycler® Instruments, covering applications in Clinical Chemistry, Pharmacogenetics, Pathogen Detection, as well as Cancer Research. TIB MOLBIOL is ISO 13485 and ISO 9001 certified.	tib-molbiol.com
Tilray Deutschland GmbH	
Tilray Germany is a GMP-certified manufacturer of medical cannabis and supplies patients, doctors, pharmacies, hospitals, authorities and researchers in Canada, the European Union, Australia and Latin America.	tilray.de
TissUse GmbH	
TissUse is a Berlin, Germany-based, biotechnology company who has developed a unique “Multi-Organ-Chip” platform for advanced toxicity testing and cutting-edge disease modelling. TissUse’s HUMIMIC Chips provide a completely new approach to predict, for example, toxicity, ADME profiles and efficacy in vitro, reducing and replacing laboratory animal testing and streamlining human clinical trials.	tissuse.com
T-Knife GmbH	
T-Knife GmbH is a spin-off of the MDC, which develops T-cell therapeutics for clinical application. The company has acquired extensive licensing rights from the MDC, including a technology platform for the generation of cancer-specific receptors, various receptors and the rights to the clinical phase 1 study.	t-knife.com
TME Pharma AG	
NOXXON Pharma is a biopharmaceutical company pioneering the development of a new class of proprietary therapeutics called Spiegelmers. Spiegelmers are the chemically synthesized, non-immunogenic alternative to antibodies. NOXXON has a diversified portfolio of clinical stage Spiegelmer therapeutics: Spiegelmer® NOX-E36, Spiegelmer® NOX-A12, Spiegelmer® NOX-H94. The Spiegelmer platform provides the Company with powerful and unique discovery capabilities, which have generated a number of additional leads under preclinical investigation.	noxxon.com
TransTissue Technologies GmbH	
TransTissue has been a subsidiary of BioTissue Technologies, Freiburg since September 2001. With more than 15 years of experience in regenerative medicine, the scientists of TransTissue Technologies have developed second-generation autologous tissue replacements, e.g. cartilage and bone grafts. We are mainly concerned with inventions and the development of tissue engineering products for regenerative medicine. We offer a broad panel of services in the field of regenerative medicine.	transtissue.com
Treamid GmbH	
Treamid GmbH develops innovative treatments in areas of high unmet medical needs. Our patent protected, preclinical lead compounds are developed in endocrinology and respiratory diseases.	treamid.com
UBF – Untersuchungs-, Beratungs- und Forschungslaboratorium GmbH	
UBF - Untersuchungs-, Beratungs- und Forschungslaboratorium GmbH is a biotechnology company active in the field of analysis, consulting and research.	ubf-research.com
UGA Biopharma GmbH	
UGA Biopharma a private Research and Development company, focuses on Research, Development and Commercialization of Biopharmaceutical products under contract with other Biopharmaceutical companies. UGA Biopharma conducts power of biosciences to develop high-tech, last generation of biomedicine, diagnostic kits, molecular biology items and also offers world class services in biotechnology area.	ugabiopharma.com
VaRi Bioscience GmbH	
VaRi Bioscience is a biotech company focusing on women’s health. We develop innovative products for women with a focus on menopause management, endometriosis, and contraception, based on a proprietary vaginal ring technology. VaRi Bioscience was founded in August 2021 by a team of experts with many years of experience in female health, gained in leading female health companies in the past. We are situated in Wildau, directly at the borders of Berlin.	vari-bioscience.com
Vaxxilon Deutschland GmbH	
Vaxxilon is a start-up established by the Max Planck Society and Actelion Ltd to discover and develop novel vaccines against major infectious diseases. The innovative technologies are based on the scientific insights and research of Professors Peter Seeberger (the Max Planck Institute of Colloids and Interfaces) and Gennaro de Libero (University Hospital of Basel). Vaxxilon is advancing several vaccine candidates using homogeneous, synthetically produced carbohydrate antigens.	vaxxilon.com
Yashraj Biotechnology LTD.	
Yashraj Biotechnology GmbH (YBL) is part of Yashraj group, India. YBL manufactures a wide range of biomarkers in the form of native human & recombinant antigens that are used by the diagnostic industry as controls, calibrators & immunogens. YBL has been the preferred partner of most of the top 20 diagnostic companies around the world for the past 20 years. We seek partnerships with IVD companies to support their needs of different native human, recombinant antigens, monoclonal & polyclonal antibodies.	yashraj.com

ZEG BERLIN CENTER FOR EPIDEMIOLOGY AND HEALTH RESEARCH

ZEG Berlin is at the forefront of pharmacoepidemiology research, specializing in the early detection and quantification of safety risks associated with the use of therapeutic, preventative or diagnostic drugs. In 2021, they included also a division for Real-World Evidence (RWE) and Safety Data Analytics. Areas of focus include Epidemiology, Health Economics and Outcomes Research (HEOR), and Safety, as well as a broad range of therapy areas.

zeg-berlin.de

Zellwerk GmbH

Zellwerk holds manufacturing license for immune cell therapeutics. We are specialized on mass production of patient-individual T-cells, TIL, NK cells and mesenchymal stem cells using proprietary ZRP cell cultivation system and belonging perfusion bioreactors. The ZRP cell cultivation technology enables standardized and reproducible cultivation processing in a highly sterile environment. The ZRP bioreactors are also well suited for cell seeded implants as well as for production of recombinant glycoproteins on customized cell carriers.

zellwerk.biz

Zytomed Systems GmbH

Zytomed Systems' focus is the development, production and distribution of antibodies and detection systems for immunohistochemical cancer diagnostics as well as reagents and kits for in-situ hybridisation.

zytomed-systems.de

Medtech and Digital Health Companies

1000shapes GmbH

Digital Health	We develop software solutions for creating products that better fit humans. We convert image data into highly accurate 3D anatomical models and provide tailored solutions that improve the design and manufacturing of medical devices and facilitate individualized pre-operative planning of surgical interventions.	1000shapes.com
----------------	---	---

3M Health Information Systems GmbH

Digital Health	The product portfolio of 3M Health Information Systems includes software for coding, grouping, controlling, and performance analysis in the DRG and PEPP context and solutions for medical quality management.	3mdeutschland.de
----------------	--	---

80 Beats Medical GmbH

Medtech	At 80 Beats, we assist professionals to measure what matters, prevent cardiovascular events, improve diagnosis and therapy through innovative digital biomarkers and accessible technology.	80beatsmedical.com
---------	---	---

A. Berkholz & Sohn GmbH & Co. KG

Medtech	Repair and custom manufacture of surgical instruments, incl. minimal invasive surgery instruments.	berkholz-berlin.de
---------	--	---

aap Implantate AG

Medtech	aap is a Berlin-based globally active medical device company developing, manufacturing and marketing products for trauma. The IP-protected portfolio includes besides the innovative anatomical plating system LOQTEQ®, a wide range of cannulated screws. In addition, aap has an innovation pipeline with promising development projects as the antibacterial silver coating technology and the resorbable magnesium implants technology.	aap.de
---------	---	-------------------------------------

aap Joints GmbH

Medtech	aap Joints GmbH is a Berlin based medical technology manufacturer that designs, develops, manufactures and distributes orthopaedic implants and related instruments. Its product portfolio includes primary and revision hip and knee implants that help patients worldwide to relieve pain, restructure mobility and improve quality of life.	aap.de
---------	--	-------------------------------------

AB Diagnostic Systems GmbH

Medtech	Founded in 2010, AB Diagnostic Systems has established itself worldwide as a market leader in the field of ELISA clinical diagnostics. Our mission is to reinvent the ideal diagnostic kit for blood banks and diagnostic laboratories. We focus on precision, quality, and usability, enabling the laboratory staff to work more intuitively and efficiently achieving accurate results.	ab-ds.de
---------	---	---

Ada Health GmbH

Digital Health	Ada Health GmbH is a global health company founded by doctors, scientists, and industry pioneers to create new possibilities for personal health. Ada's core system connects medical knowledge with intelligent technology to help all people actively manage their health and medical professionals to deliver effective care.	ada.com
----------------	---	---------------------------------------

Advosense GmbH

Medtech	Advosense is on a mission to transform geriatric care, starting with incontinence management. We are empowering clinicians to know when, where and how to best respond to their patient's needs by using intelligent sensors to do so. The Sensa System is a bedside sensor system and IoT platform. The system detects patients and resident's incontinence episodes providing real-time notifications to their caregivers so they can be cared for and managed effectively in hospitals and nursing homes. Sensa not only provides empathic, quality care but helps our clinicians in a resource constrained, episodic environment; reducing costs, increasing the quality of life for our patients, families and caregivers, and ultimately advocating for an age friendly, healthy society.	advosense.com
---------	---	---

AEMtec GmbH

Medtech	AEMtec, located in the prestigious science and technology center in Berlin-Adlershof, is a global acting specialist for the development and production of a variety of precision optoelectronic products, including components, subsystems, modules and complete systems. With our wide range of technologies we are the right partner for sophisticated solutions in the area of miniaturization.	aemtec.com
---------	--	---

Aeroscan GmbH

Medtech		aeroscan.com
---------	--	---

ai4medicine UG

Digital Health	AI4medicine has created the App HealthAdvisor to help prevent a stroke. This helps to recognize the personal risk and minimize it.	ai4medicine.com
----------------	--	---

aicura medical GmbH		
Digital Health	AICURA is a building block to transform our healthcare systems to provide personalized medicine for everybody, everywhere. The AICURA Platform accelerates the development and usage of Artificial Intelligence in healthcare and allows its users to understand data that is generated along the whole patient journey faster, cost-efficiently, and securely. For Pharma clients, AICURA improves the clinical research process and reduces costs by leveraging real-world data to accelerate new product launches. For Healthcare providers, the integration of the AICURA platform can increase their revenue from third-party-funded clinical research while reducing costs and effort. Additionally, once integrated, the applications running on the platform can support clinical workflows such as resource management and planning. Applications are multi-fold and allow unlimited use cases scenarios in the clinical routine.	aicura-medical.com
Aignostics GmbH		
Digital Health		aignostics.com
AKmira optronics GmbH		
Medtech	AKmira optronics GmbH is a start-up company which currently develops a 3D scanner based on digital optical holography. This brand new technology was matured and transferred from academia to industry by the inventor and founder Dr. Alexander Knüttel. The scanner will predominantly be available for the 3D endoscopy market where miniaturization is an absolute premium. Currently we are also targeting large medical companies to broaden the future sales activities.	akmira-optronics.de
alco GmbH		
Medtech	Since the Year 2000, we are developing, producing and distributing high-quality medical device products for interventional medicine.	alco-gmbh.de
AmbulanzPartner SozioTechnologie APST GmbH		
Digital Health	APST is a multi-sided platform for patients with neurological diseases such as amyotrophic lateral sclerosis (ALS), spinal muscle atrophy (SMA) and other neuromuscular disorders. It combines a digital platform with a patient-centered case management. The APST platform links professional health providers such as pharmacies and medical manufacturers to patients and their relatives. Based on the platform-approach, APST provides research services focusing on real world evidence and patient reported outcomes.	ambulanzpartner.de
appamedix UG		
Digital Health	Appamedix develops apps for patients medical laboratories and hospitals. Our team consists of UI and UX designers, Doctors and computer scientists.	ampexit.com
ArgosConsult Strategy Consultants Dr. Wille		
Digital Health	ArgosConsult is a competence center for business development and innovation management in healthcare industries. We help companies to structure their strategic growth, market access and innovation process. Our core competencies are market oriented new product development and service engineering. We use proven methods for B2B business modeling and a seamless innovation process ensuring sustaining market success. This includes access to dedicated networks for regulatory support, funding programs and international collaboration.	argosconsult.de
Aristotech Industries GmbH		
Medtech	Orthopaedic Forgings from Germany located in Luckenwalde/Brandenburg on over 30.000ft production plant.	aristotech.de
ASKANIA Mikroskop Technik Rathenow GmbH		
Medtech	We, ASKANIA Mikroskop Technik Rathenow GmbH, offer microscopes for education, biological, medical experience and also stereomicroscopes for applications in science and technology. A variety of additional accessories and special models meet the requirements of modern microscopy equipment. The products are characterized by a precise construction and a sustainable design and are exported worldwide.	askania.de
AssistMe GmbH		
Digital Health	AssistMe is developing an intelligent and connected incontinence pant for elderly people. It can detect the amount and type of excrement in real time sending recommendation for action to nursing staff, enabling the prioritisation of tasks on an ad hoc basis. Nursing staff are greatly relieved, as there are fewer leakages, secondary illnesses are prevented, and schedules become more efficient.	assistme.io

Athena DiaX GmbH		
Medtech	AthenaDiaX GmbH is a dynamic product manufacturer with extensive clinical know-how. Our values are responsibility and integrity, with which we want to improve the perspective of people with health risks. The AthenaDiaX products serve high-risk patients and are of benefit to a large number of people. They are an integral part of the clinical diagnostics of large risk groups.	athenadiax.com
audatic GmbH		
Digital Health	We are building systems to intelligently modify sound using state of the art deep learning technology and unique datasets. Our personalized sound environment allows users to customize sounds to their individual taste.	audatic.ai
AUGLETICS GmbH		
Digital Health	The AUGLETICS Eight is exactly what ambitious rowing clubs have always dreamed of: a rowing ergometer that feels almost like rowing on water. The electronically controlled eddy current brake allows a much more realistic movement, as the draw resistance starts from the first millimeter. With a sensor technology that provides the most accurate body measurement data and a networkability that can be simulated in training competitions.	augletics.de
AVIDAL Distribution GmbH		
Medtech	AVIDAL specializes in cardio-vascular, peripheral-vascular, and neuro-vascular patient care. With our business unit AVIDAL Distribution, we offer a strong platform for medical devices manufacturers wanting to enter the central European markets. Our management team combines over 35 years of global marketing and sales experience. We hold close relationships with all cardio-vascular, peripheral-vascular and neuro-vascular key opinion leaders of these markets and are present in the majority of the top 100 care units.	avidal.net
Awaik GmbH		
Digital Health	We are a startup specialized in neuro technologies and machine learning, and we develop and produce the best in class consumer medical-grade electroencephalogram.	
B. Braun Miethke GmbH & Co. KG		
Medtech	B. Braun Miethke GmbH & Co. KG is a joint venture between Aesculap AG, a subsidiary of the medical technology and pharmaceutical company B. memodio GmbH		
Digital Health	memodio GmbH is a start-up from the heart of Potsdam. Our interdisciplinary team of physicians, software engineers and interaction designers create solutions around people with cognitive decline, mild cognitive impairment and dementia. Our strength is the combination of scientific knowledge and user-friendly products for better patient care.	memodio-app.com

Memorado GmbH		
Digital Health	Memorado is based on the latest scientific research. Deeply anchored in science and developed by brain training experts, Memorado has launched the "Global Cognition Initiative" to promote neuroscience research.	memorado.com
Merete GmbH		
Medtech	Female owned and 25 years of experience as an expert and provider of unique solutions in orthopaedics and trauma surgery Working in continuous dialogue with experienced and highly respected surgeons to developing sophisticated solutions for difficult problems. Working side by side with surgeons to achieve our primary goal: maximum patient well-being.	merete.de
MEYTEC GmbH Informationssysteme		
Medtech	MEYTEC GmbH is an established provider of bespoke supply concepts and services for health care based on innovative telemedicine and medical technologies. MEYTEC GmbH invests heavily in resources, incl. people, workshops and laboratories. This sophisticated approach enables MEYTEC provision of fully competitive and ready-to-use solutions locally and worldwide.	meytec.com
midge medical GmbH		
Medtech	Developed in Berlin, manufactured in Germany. At midge medical, we work tirelessly to advance molecular diagnostics and continuously improve testing practice and procedure workflows. minoo is our first product platform with a unique molecular technology. Approved for distribution since May 2022, we are introducing the technology in Europe. The efficiency of the computing power of our own mobile app delivers sample analyses within 18 minutes and the system is robust against mutations - without collecting personal data.	betriebsarzt.minoo.de
Mimi Hearing Technologies GmbH		
Digital Health	Mimi Hearing Technologies is a global leader for patented, award-winning sound personalization and hearing wellbeing technology that can be easily integrated into any consumer electronics device, including headphones, TVs and smartphones. Mimi offers an enhanced audio solution that adapts to the listener's unique hearing profile, and develops the number one digital hearing test app on the market.	mimi.io
Mindable Health GmbH		
Medtech	Diga-App für Panikstörung und Agoraphobie	mindable.health
Minddistrict GmbH		
Digital Health	Minddistrict was founded in 2008 by CEO Mark Willems. Minddistrict is a data-secure, flexible and user-friendly e-mental health platform, with a broad product catalog of online modules, diaries and questionnaires.	minddistrict.de
Mio Health UG		
Digital Health	Mio Health - Deine Herzgesundheit in Deiner Hand.	miohealth.de
Mirow Systemtechnik GmbH		
Supplier	Custom specific development and fabrication of flex sensor- and actuator- systems, based on PVDF and EAE plastic film material.	mirow.de
Modis GmbH		
Digital Health	With Modis, your business is prepared for a change in this fast-changing world: we connect companies and talent and provide you with innovative solutions that are optimally tailored to your challenges. In our global network of the brightest minds, we connect the converging worlds of IT, engineering and life sciences through our specialists and solutions.	modis.com/de-de
Mokita Medical GmbH		
Medtech		mokitamedical.com
Motognosis UG		
Digital Health	Motognosis was founded in 2014 as a technology transfer startup from the Charité Neurodiagnostics Laboratory, NeuroCure Clinical Research Center, Charité - Universitätsmedizin Berlin. Our dynamic team consists of 4D image analysis experts with different, complementary backgrounds. We work in close collaboration with experienced clinicians and clinical scientists to develop the best possible technology for motion analysis in neurologic disorders.	motognosis.com
MotorSkins UG		
Medtech	Soft-exoskeletons for people. Bringing confidence into your walk.	motorskins.com

MTR plus Vertriebs GmbH		
Medtech	MTR+ is an ISO certified company, which has specialized in the development, production and sale of devices for electric stimulation.	mtrplus.com
MX Healthcare GmbH		
Medtech	Vara: Breast cancer screening platform with AI. MX Healthcare GmbH develops machine learning-based workflows that users love to work with. The first product already CE certified, Vara, is a machine learning-based platform for radiologists to support breast cancer detection, reducing repetitive work and allowing them to focus on the cases that really matter.	vara.ai
Myosotis GmbH		
Digital Health	In close collaboration with nursing home operators and 8 months of testing, the founders of Myosotis GmbH are proud to have designed a product with myo that brings together people in care. The caregivers can inform relatives with myo about trips, events or other event	myo.de
Neo Q Quality in Imaging GmbH		
Medtech		radioreport.com
Neofonie GmbH		
Digital Health	As Berlin-based digital agency Neofonie develops individual and user-centric solutions in the areas of mobile, commerce, content and artificial intelligence. Especially for the healthcare sector, Neofonie fulfils the requirements of the Medical Device Regulation (MDR) in Europe with ISO 13485 certification and is authorised to design and implement medical apps and software as medical devices. Customers include, among others, Wort&Bild Verlag, HUK-COBURG, curacado and the AO Foundation.	neofonie.de
Neomento		
Digital Health	As a spin-off from a Helmholtz research center, neomento develops high-end Virtual Reality-based therapy solutions for the treatment of mental disorders, such as anxiety disorders and addictions. The international and interdisciplinary team is based in the heart of Berlin, at the Charité Campus Berlin-Mitte.	neomento.de
Neuromodtronic GmbH		
Medtech	Neuromodtronic develops a unique non-invasive brain stimulation device to treat patients with individual functional disorders of the brain. The mission is to improve neurological functions after stroke, head injury, glaucoma, amblyopia, and pain.	eyetronic-therapie.de
NeuroNation (Synaptikon GmbH)		
Digital Health	CE-certified NeuroNation is developing medical devices used for the prevention in healthy aging and as a treatment for patients with Post-Covid, MCI, Parkinson's, MS, and other indications, improving access to care. With over 20 million users, we leverage our data to develop personalized treatments to achieve the highest effects and adherence of our Multi-Domain Cognitive Training products.	neuronation.com
Neurosphere UG (haftungsbeschränkt)		
Digital Health	As a neurotech company, we believe that the human brain has immense capabilities. We want to unlock this cognitive potential by making the advances of neurotech simple to use, understandable and more accessible for everyone. Our first products in this market are lightweight EEG brain-computer interfaces. We are currently building data models and improving algorithms for automatic Neurofeedback training, and the predictive analyses of quantifiable cognitive processes.	neurosphere.io
Nevita Systems UG		
Digital Health	Nevita is an low-cost, mobile and modular telemedicine system designed to support the medical care of patients in developing and emerging countries or environments with limited resources and competencies. Health providers are constantly faced with complex situations that they cannot assess without help. Nevita offers automated decision support. Emergency situations are recognized accordingly and further procedures are proposed.	nevita-systems.com
Newsenselab GmbH		
Digital Health	Newsenselab develops digital therapies for more than 1 bn migraine patients globally. Our product "M-sense" is the first certified medical product and leads in the market segment with 220k downloads in DACH.	m-sense.de
NEXUS / MARABU GmbH		
Digital Health	NEXUS / MARABU is one of the leading software manufacturers in the healthcare sector in the areas of digital archiving, document and process management – ECM for short. Customers benefit from a comprehensive range of consulting and services. The company has been part of the NEXUS Group since 2014.	nexus-marabu.de

NEXUS SWISSLAB GmbH		
Digital Health Software Provider	NEXUS SWISSLAB GmbH as part of NEXUS / LAB provides software solutions for the entire cosmos of laboratory diagnostics, pathology and cytology. From information system for core or special lab over a large portfolio in the area of digital pathology and cytology to communication and portal solutions - NEXUS is the answer for digital transformation into the new age. Special hardware solutions, for example cassette- and slide-printers, complete the portfolio.	nexus-swisslab.de
Nia Health GmbH		
Digital Health	Based on its innovative MedTech Platform for personalized patient support, Nia Health develops medical software. Our end-to-end solutions are indication-specific and tailored to the individual needs of each patient. We cover a wide variety of use cases. Nia Health's Digital Therapeutics (DTx) combine strong clinical validation with empowerment, gamification and machine learning.	nia-medtech.com
NIM Competence Center for Digital Healthcare GmbH		
Digital Health	The company is specialized in the field of medical imaging and artificial intelligence. The product RADIOLYTX is a medical imaging platform for the early diagnosis of Parkinson's disease, Alzheimer's disease, and cancer screening based on radiomics and A.I. algorithms applied to Positron Emission Tomography and metabolics data.	radiolytx.com
NIRx Medizintechnik GmbH		
Medtech	NIRX is a world leader in providing integrated solutions for optical neuroimaging (NIRS). NIRX was founded more than 20 years ago in NY by one of the field's originators as an academic spin-off, and nowadays has offices in Berlin, Los Angeles, Minneapolis and New York. Our engineers and grant-funded investigators are providing researchers with solutions for the most demanding investigative applications. NIRX offers outstanding support and education through workshops, webinars, and conferences.	nirx.de
Nocturne GmbH		
Digital Health	We founded the company to pursue our vision, enabling diagnosis and monitoring of neurologic disorders through non-invasive and quick imaging of the eye's retina. Our services focus on multiple sclerosis and related disease, with the possibility of further applications in Parkinson's and Alzheimer's disease.	nocturne.one
NORDPRAX IT-Service GmbH		
Digital Health	Professional IT solutions, in particular for doctors, company physicians and freelance professionals.	nordprax.de
nova motum Services & Consulting GmbH		
Digital Health	nova motum® focusses on development & design of Mobile Connectivity Solutions e.g. for eHealth. Our teams offer more than 18 years of experience in the development and design of Mobile Connectivity software.	novamotum.net
NursIT Institute GmbH		
Medtech Digital Health	The nursIT Institute GmbH specializes in services and products for the largest group of stakeholders in the health care market – the nursing professionals. The company uses a proven model of structured care, with the goal of reducing costs and improving the quality of care as well as employee satisfaction. The model is based on four pillars: process management, technology, training and care economics. nursIT is confident that the use of the structured care implemented via its product careIT is the solution for this problem. The company enhances its processes through structured care. Analysis and optimization of nursing processes is operated by the unique nursing workflow management system "careIT".	nursit-institute.de
OD-OS GmbH		
Medtech	OD-OS is pioneering retina navigation with its all-digital Navilas® Laser System. The only navigated retina laser features a unique integration of imaging, planning, treatment, and documentation which allows for effective and comfortable treatment of vision-threatening retinal diseases. The image-guided treatment process supports precise photocoagulation as well as tissue-friendly microsecond pulsing protocols.	od-os.com
OHST Medizintechnik AG		
Medtech	We, as OHST Medical Technology, are one of the leading manufacturers in the field of endoprosthetics. OHST stands for family owned business with 85 years of experience. Our medical products Made in Germany are long-time trusted by surgeons around the globe. We have applied our comprehensive knowledge in the endoprosthetics field to develop our own product range: customer-oriented implant systems for hip & knee joints. Over many decades of use, the implants have proven to be safe. Our surgical instruments give the surgeon the precision which turns an implant into a successful solution for the patient. All components are supplied in sterile packaging and are ready for immediate use in the operating room. Our target-customers are distributors around the world that sell implants and instruments to hospitals and/or doctors.	ohst.de

Olympus Soft Imaging Solutions GmbH		
Medtech	Olympus Soft Imaging Solutions (OSIS) is the Center of Excellence for worldwide microscopic imaging by Olympus. The areas of activity are diverse and include development, manufacturing and production as well as service and support for customized software and hardware solutions for the capturing, archiving, processing and analysis of scientific and industrial images.	olympus-ims.com/de/
Olympus Surgical Technologies Europe		
Medtech	Within the Olympus Corporation, Olympus Surgical Technologies Europe in Teltow is a worldwide competence center for medical radio-frequency technologies especially high-frequency generators. With more than 110 employees, Olympus develops and manufactures cutting-edge medical technology in Teltow. The success is based on many years of in-depth experience in the field of minimally invasive surgery (former Celon AG).	olympus-oste.eu
OPTIMAL SYSTEMS GmbH		
Digital Health	Find company information quickly and reliably, manage it transparently, distribute it to the right persons, and archive it on an audit-proof basis: for more than two decades, OPTIMAL SYSTEMS has been developing and selling software solutions for Enterprise Content Management (ECM) helping more than 2000 companies make better decisions and to plan and implement their processes more effectively and rapidly.	optimal-systems.de
OraMetrix GmbH		
Digital Health	OraMetrix is the leading industry provider of innovative 3-D technology solutions improving the quality and efficiency of orthodontic care. The proprietary technology, the suresmile system, represents a significant leap forward in orthodontics.	suresmile.com
Orpedo Germany GmbH		
Medtech	We develop, produce and market supports, orthoses and various orthopedic aids for the prevention and rehabilitation of various diseases and injuries. Through our product range, all the regions of the body are covered. Our production sites are located exclusively in Europe and using only tested, certified and skin-friendly materials.	orpedo.com
Osyпка Medical GmbH		
Medtech	Osyпка Medical is a forward-thinking Adlershof-based tech company supplying a wide range of temporary pacemakers and noninvasive hemodynamic monitors to hospitals world-wide. Our cutting-edge technology provides crucial solutions for cardiovascular care in the emergency room, ICU, and during cardiac surgery. Learn more about our life-saving devices and our continued effort towards innovation in software development, computer science, and A.I.	osypkamed.com
Ottobock SE & Co. KGaA		
Medtech Digital Health	For more than 100 years, Ottobock has been developing innovative treatment solutions in the fields of prosthetics, orthotics, wheelchairs and patient care. More than 8,000 employees empower people in more than 130 countries and about 390 patient care centers to live their lives as they want to live them. For freedom of movement, quality for life and independence. Since 2018, Ottobock has been transferring its expertise in biomechanics to exoskeletons for ergonomic workplaces.	ottobock.com/en
Oviva AG		
Digital Health	Oviva programs combine personalized, one-to-one care from expert healthcare professionals with the latest evidence on behavior change. We use technology to help make improving your health easier from the comfort of your home. Oviva's approach was designed and tested by NHS health care professionals, including doctors, dietitians, psychologists, and nurses, as well as leading academics in behavioral change.	oviva.com
PAR Medizintechnik GmbH & Co. KG		
Medtech	PAR Medizintechnik GmbH was established in Berlin in 1988. Our purpose is to develop, manufacture and distribute electronic equipment for the measurement, storage and processing of various human vital signs.	par-berlin.com
parelectrics UG		
Medtech	parelectrics has specialized in the development of medical devices that use the method of Par-electric Spectroscopy. Our products enable quick and precise non-invasive measurements of the structure and dynamics of biological material including the analysis and clear graphical presentation of the results.	parelectrics.com/unternehmen.html

PeakProfiling GmbH		
Digital Health	The basis of PeakProfiling came into existence in 2004: the company AudioProfiling was founded based on research in Mathematics and Musicology at Humboldt University - it has been conducting contract research with high-ranking institutions for more than a decade. After incorporation, the newly named PeakProfiling has developed the procedures into a comprehensive analysis system that includes all the sonic and design aspects of audio data and in particular language.	peakprofiling.com
Pentracor GmbH		
Medtech	In the event of a heart attack, stroke or in COVID-19, the acute phase component C-reactive protein (CRP) is responsible for most of the damage. The new adsorber CE-marked (PentraSorb® CRP) for the extracorporeal therapeutic reduction of CRP amounts significantly decreases damage in the patients. This new form of therapy was a highlight of the 2019 conference of the German Society of Cardiology, won 2nd place in the German Medical Award, won the future award of the federal state of Brandenburg, and is being reimbursed.	pentracor.de
PhantomX GmbH		
Digital Health	PhantomX GmbH was founded at the end of 2018 by four employees of the Institute of Radiology of the Charité Tetje Dietrich, Dr. Paul Jahnke, Dr. Felix Schwarz and Marco Ziegert. The company manufactures highly realistic phantoms mimicking patients for all x-ray related applications in medicine. The special focus is on CT imaging and radiation therapy. The technology enables developments, testing and quality control of hardware and software components for improved patient diagnostics and treatment.	phantomx.de
Philips GmbH Market DACH		
Medtech	Royal Philips is a leading health technology company focused on improving people's health and enabling better outcomes across the health continuum from healthy living and prevention, to diagnosis, treatment and home care.	philips.de
PHOEBUS IT consulting GmbH		
Digital Health	Comprehensive controlling solutions for hospitals, manufacturers and service providers, transport and logistics companies, suppliers and disposal operators. Combinations of MIS with cost accounting and consulting tools; payer accounting, medical and operation controlling, budgeting/planning, flexible evaluations, reporting.	phoebus.de
Physiomatic GmbH		
Medtech	With a wide range of medical indications has Physio Matic GmbH high-quality solutions for ergonomic chairs and sleeping. Its products developed Physio Matic based cutting-edge technologies by the latest scientific findings.	
PicoQuant GmbH		
Supplier	The PicoQuant group was founded in 1996 to develop robust, compact, and easy to use time-resolved instrumentation and systems. PicoQuant is known as a company leading in the field of pulsed diode lasers, time-resolved data acquisition, single photon counting, and fluorescence instrumentation.	picoquant.com
Pilot Blankenfelde medizinisch elektronische Geräte GmbH		
Medtech	Development, manufacture and sale of electronic medical technology products, focusing on objective measuring systems for diagnostics in otorhinolaryngology and neurology.	pilot-blankenfelde.de
Pneumatik Berlin GmbH PTM		
Medtech	Convincing solutions, products & services which meet the highest demands required by modern medical practices determine how our employees operate. Our product range includes Medical ceiling-mounted supply units, energy bridge systems, OR Wall systems & doors, Central medical gas supply systems and a broad range of medical accessories.	pneumatik-berlin.de
PoroUS GmbH		
Medtech	PoroUS GmbH develops medical devices to better diagnose osteoporosis and rare bone diseases. The PoroUS solution uses quantitative ultrasound (QUS) technology with patented intelligent algorithms being able to measure the cortical bone quality to a microscopic pore level without radiation hazards.	porous.care
Primax Berlin GmbH		
Medtech	Manufacturer of consumables in the fields of X-ray and Ultrasound diagnostics. Partner in Dental Field as a manufacturer of dental X-ray films and supplier of versatile accessories. Centre of Competence for X-ray Protection Manufacturer of Protective Clothing and supplier of lead-based protection products both as semi-finished and as finished products.	primax-berlin.de

ProMetronics UG		
Medtech		prometronics.com
PROMOTEC-Medizintechnik GmbH		
Supplier	Manufacture, packaging of medical instruments for minimally invasive surgery.	promotec-medizintechnik.de
PSH Perfecta Soft & Hardware GmbH		
Digital Health	A provider of medical system solutions. We equip medical practices with hard- and software.	psh-perfecta.de
Quantum Charging Germany UG		
Digital Health	Team invented an absolutely new method of energy transfer based on energy quantization; a principle first put forward by Max Planck in 1901. Technology is able to charge active implantable devices (brain pacemaker, cardiac pacemaker, insulin pump, delivery drug implants, etc.) inside of the human body. Technology operates outside of electromagnetic fields, and does not generate heat and emission. Solution will save millions of lives.	technovator.co
QUNOMEDICAL GmbH		
Digital Health	We believe that the ultimate healthcare choice of—what to do, where to go, and with whom to have a procedure, is made easier with someone you trust on your side. Qunomedical strives to be that someone for you. Our goal is to be your partner through your healthcare experience and to open the doors to the highest quality information, doctors, clinics and care—worldwide.	qunomedical.com/de
Raccoon.World		
Digital Health	Raccoon.World empowers people after trauma to do their home exercise program (HEP) and provides connection with their physical therapist between in-person sessions and after the course. With digital platform Raccoon.Recovery patients can successfully do the HEP created by their physiotherapists from high-quality video lessons, and both monitor the rehab progress. Thanks to this, patients reach their rehab goals faster and increase their loyalty to therapists.	raccoon.world
Rayner Surgical GmbH		
Medtech	Rayner designs and manufactures intraocular lenses for use in cataract surgery. When Sir Harold Ridley designed the world's first IOL in 1949, he chose Rayner to manufacture this ground-breaking invention. Driven by science and with more than 65 years of experience, we remain at the forefront of innovation.	rayner.com
Realtime-Imaging®		
Supplier	We develop custom-tailored, highly optimized image processing software and systems for you.	realtime-imaging.de
Recare Deutschland GmbH		
Digital Health	Through our digital solution, we connect all parties involved in the care transfer process nationwide in order to make it more efficient, transparent and accessible. The follow-up care to the hospital stay is ensured by means of real-time coordination, which allows a seamless patient transfer.	recaresolutions.com
Reha-Stim Medtec GmbH & Co. KG		
Medtech	Manufacturer and distributor of medical devices for neurological rehabilitation.	reha-stim.com/de
Rekoo Health GmbH		
Digital Health	We are Rekoo, the world's first virtual clinic for stroke recovery. Stroke is a leading cause of death and disability, disrupting millions of lives every year. In today's care systems, patients don't find the support they need to recover. Rekoo combines newest medical research with modern technology to provide every patient with the best possible care.	rekoo.de
ReMoD UG		
Medtech	The ReMoD team is a Berlin start-up in the rehabilitation technology industry. We focus on a new method to correct posture and movement for patients with posture problems.	hemiparese-therapie.de
Robert Helwig GmbH		
Medtech	Manufacture of syringes and cannules for human and veterinary medicine and technical applications.	hero-berlin.de
Robert Riele GmbH & Co. KG		
Supplier	Development, production and sale of photometers, in particular for clinical chemistry, water analyses, industrial applications and for training purposes; OEM	riele.de
Rocket Medical GmbH		
Digital Health	Rocket Medical GmbH developed a new generation of equipment for the field of medical technology.	deu.rocketmedical.com

roclub GmbH		
Digital Health		roclub.com
Roland Consult Stasche & Finger GmbH		
Medtech	The company is a globally playing producer for ophthalmological diagnostic systems with satisfied clients in about 100 countries on all continents with extraordinary service.	roland-consult.de
RoX Health GmbH		
Medtech	RoX Health GmbH is a company builder and start-up studio in the field of digital health solutions. As a subsidiary of Roche, it is closely linked to the group's broad network. RoX Health focuses on the German healthcare market and provides founders and start-ups with its expertise in the healthcare sector. Current focus: digital solutions in the area of neurodegenerative and oncological diseases.	roxhealth.com
S&V Technologies GmbH		
Medtech	S&V Technologies GmbH is an innovative and dynamic company that employs a highly motivated team of experts with comprehensive knowledge in the research and development of new biomaterials. The aim of S&V Technologies GmbH, which is built on the synergy of the team's competence and the ingenuity of nature, is to develop innovative products for patients and practitioners in the area of esthetic medicine. As a result the line of aesthetic products such as HA-dermal fillers and other products based on HA was created under the brand name AMALIAN. All products are "Made in Germany" and meet the highest quality and safety requirements for patients and physicians.	amalian.de
Safe4Net GmbH		
Digital Health	Development of innovative health care software systems. Our focus is on trans sectoral collaboration, data security and data evaluation: <ul style="list-style-type: none"> • Quality assurance systems for integrated health care processes (oncology, orthopedy, ophthalmology, etc.). • Documentation and evaluation Systems e.g. for population-based and hospital registry. • Patient-reported outcome measurement (PROMs) Systems. 	safe4net.de
samedi GmbH		
Digital Health	We founded samedi GmbH in 2008 and set ourselves the goal of solving the communication problems across the boundaries of the individual doctor's practice wall and hospital wall for the benefit of the patient. We started by simplifying and structuring the appointment booking in the health sector and establishing the patient service – above all the online appointment booking with the doctor. Today, the functions and areas of application of our web software go far beyond mere online appointment booking. We network medical information, make it available at all treatment-relevant locations, and ultimately improve patient care quality.	samedi.de/index.html
Schallware GmbH		
Digital Health	The Schallware Ultrasound Simulator allows your doctors to practice ultrasound diagnostics just as under real conditions.	schallware.de
Schiller Medizintechnik GmbH		
Medtech	We are an internationally leading manufacturer and supplier of medical technology solutions, focusing on cardiopulmonary diagnostics and therapy. Our products save lives and provide physicians and nurses with professional support.	schiller.ch/de/de
ScientiFY GmbH		
Medtech	ScientiFY GmbH is a young Berlin company that supports innovative companies of all types and sizes as well as public institutions such as universities or research institutes in applying for funding. The company supports companies and research institutions in submitting applications as well as ongoing project support through to the follow-up of projects. The focus of the activity is in the field of medical technology.	scientific.de
SectorCon Ingenieurgesellschaft für System- und Softwaretechnik mbH		
Medtech	ConCardiac is a monitoring system for the perioperative area. It non-invasively records important vital parameters, analyzes them via a wirelessly connected platform and provides the attending physician with an overview of the patient's overall hemodynamic situation.	concardiac.de
Selfapy GmbH		
Digital Health	Selfapy is an online self-help program that provides quick and flexible help to people dealing with depression, stress, anxiety and eating disorders through videos, text and interactive exercises. The CE-certified, scientifically proven 12 weeks programs are accompanied by qualified psychologists who support users through calls and chat conversations.	selfapy.de

Senmotion GmbH		
Medtech	Senmotion offers a revolutionary 360° solution for diagnostics, prevention and therapy. We provide high-quality data for motion analysis and research in a wide range of applications. Using a modern therapy and training approach, we use individual kinetic data and powerful machine learning algorithms for real-time diagnostics and interventions.	senmotion.com
sepp.med GmbH		
Medtech Digital Health	We shape the digitalization of the future. This starts with consulting on regulatory requirements, standards and guidelines (ISO/IEC, SPICE, FDA or MDR), includes requirements and project management and continues with the development process all the way to setting up a reliable test concept. We are pleased to take on entire development or test assignments and we share our knowledge in our academy.	seppmed.de
Servolab Medizin Software GmbH		
Digital Health	Servolab Medizin Software GmbH was founded more than 25 years ago, is based in Berlin and has a subsidiary located in Potsdam. Our strength is the development of perfected lab systems, good support goes without saying.	servolab.de

Digital Health		smartify-it.de
SOMATEX Medical Technologies GmbH		
Medtech	At SOMATEX®, we design high-quality medical products with a focus on breast interventions. The company's product portfolio includes biopsy site markers and localization wires, solutions for pulmonary interventions, biopsy, fetal therapy and assisted reproduction, radiation protection as well as surgical illumination.	somatex.com
SpaceBit GmbH		
Digital Health	The main goal of company SpaceBit GmbH, founded in 1995, is to develop and provide software for physiological measurements and psychophysiological studies. Primarily PC- and µC-Software is applied in combination with the modular system "Healthlab".	spacebit.de
Sphaira Medical GmbH		
Medtech	Sphaira Medical fundamentally improves medical isolation. We bring people together no matter how dangerous the circumstances. Our product MOBY is the world's first Mobile Protective Pod. MOBY allows safe treatment, provides mobility to patients, and enables anyone to conduct visits safely. We facilitate face-to-face, in person, natural interaction – without risking exposure to pathogens.	sphaira.com

SPRINGER AKTIV AG		
Medtech	Manufacturer of semi customized medical insoles for orthopedic shops in germany and all over the world. Applications of the high-tech shoe inlays for children, sportsmen and -women and diabetics; supply of measuring shafts and devices for measuring foot pressure.	springer-berlin.de
SumOne		
Digital Health		sum-one.org
SurgiData UG		
Medtech	SurgiData is developing a digital platform that supports internal workflows in hospitals. Our platform digitizes the entire hospital journey from admission, anesthesia transfer to the ward, the entire ward process until patient discharge. By integrating all the stakeholders within one platform, medical information can flow seamlessly from one stakeholder to the next. So the entire staff is always well informed and can make the best decision possible to ensure high treatment quality.	plato-health.com
T&T medilogic Medizintechnik GmbH		
Medtech	A medium-sized enterprise in medical technology, which has its emphasis in the areas of biomechanics and image processing. Quintessential points of our work are measurement and evaluation of mechanical size at humans and animals.	medilogic.com
Tech Innosphere GmbH		
Medtech	Innosphere develops AI-powered brain-stimulation medical device, for personalized effective and safe treatment of cognitive disorders. The first target indication of Innosphere is ADHD. The Innosphere patented electrodes and AF-RNS™ technology, provide accurate and effective stimulation to specific brain regions. Innosphere collaborates with leading global institutes, such as the Charite, Yale university and the university of Oxford. This treatment enhances neural activity in the selected brain regions and creates new neural connections, by that alleviating ADHD symptoms effectively without side effects. As a result, the patient experiences an immediate and long-lasting reduction in ADHD symptoms. This technology is clinically validated at leading medical institutes, with a reduction of 50% of symptom severity after 10 treatment sessions, and this efficacy is maintained even two months after stopping the intervention.	inno-sphere.com
TEFRA Hochfrequenz Apparate Rudolf Messerschmidt GmbH		
Medtech	TEFRA radiofrequency therapy – gentle naturopathic through the use of high-frequency currents to promote or trigger the self-healing of the body.	tefra-berlin.com
ThinkSono GmbH		
Digital Health	ThinkSono is a company at the cutting edge of medicine and technology. The team consists of world-class engineers and clinicians to solve the problem of deep vein thrombosis (DVT) diagnosis. DVT is one of the world's deadliest conditions, associated with 800,000 deaths a year.	thinksono.com
Thyve (mHealth Pioneers GmbH)		
Digital Health	Thyve empowers healthcare providers to deliver data-driven, value-based care. It's SDK integrates seamlessly into digital services and provides instant access to health-related data from smartphones, wearables & connected medical products. Applying several levels of artificial intelligence, Thyve unlocks a wealth of insights from their continuous stream of lifestyle and health biomarkers. Digital therapy providers, pharmaceutical companies and hospitals all over Europe rely on Thyve to improve indication understanding, individualize treatments and create reliable, long-term outcome evidence.	thyve.health
Töchter & Söhne Gesellschaft für digitale Helfer mbH		
Digital Health	Approximately 3.7 million people in need of care live in Germany. This number will continue to increase in the future. Helping these people is the driving force behind Töchter & Söhne. Töchter & Söhne wants to support unpaid caregivers and people in need as much as possible in everyday care with digital solutions. We develop and operate quality-assured e-health solutions for those affected as well as volunteers and professional caregivers. Together with users and our business customers, we develop digital solutions for improved nursing care. Our competence is reflected in our digital solutions as well as in our employees.	toechtersoehne.com
